Utilizing FERC Form 1 Actual Data
For the Billing Period 01/01/2022 to 12/31/2022

SOUTHWESTERN PUBLIC SERVICE COMPANY

General Notes: a) References to data from FERC Form 1 are indicated as: page#.line#.col.#

Note	
Letter	
Α	The revenues credited shall include amounts received directly from the SPP for service under this tariff reflecting SPS's integrated transmission facilities.
	Revenues associated with FERC annual charges, gross receipts taxes, ancillary services or other facilities revenues shall be excluded from the
	definition of transmission facilities under this tariff shall not be included as revenue credits. Revenue from coincident peak loads included
	in the DIVISOR are also not included as revenue credits unless this revenue is offset by a corresponding expense. See Worksheet B for details.
В	The annual and monthly net and gross plant carrying charges on page 7 are to be used to compute the revenue requirement for directly assigned facilities, any Base Plan Upgrades, distribution facilities, and radial lines.
С	This additional revenue requirement is determined using a net plant carrying charge (fixed carrying charge or FCR) approach. Worksheet R shows the calculation
	of the additional revenue requirements for each project receiving incentive rate treatment, as accepted by FERC by a separate docket. These individual additional revenue requirements shall be summed, for the then current year, and included here.
D	Reflects the transmission related portion of balances in Accounts 281, 282, 283, 190, and 255 as adjusted by any amounts in contra accounts identified as
	regulatory assets or liabilities related to FASB 106, 109, 133,158 or FASB Interpretation No. 48. Balance of Account 255 is reduced by prior flow throughs and
	completely excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note M.
	The calculation of ADIT for both the true-up and the annual projection will be performed in accordance with IRS regulation Section 1.167(I)-1(h)(6).
	The Annual True-Up for a given year will use the same methodology that was used to project that year's rates. (Except for ADIT Proration which is
E	described on Table 21A of the template.) Includes any incentive Construction Work in Progress (CWIP), any related Allowance for Funds Used During Construction (AFUDC), any unamortized balances
E	related to the recovery of abandoned incentive plant costs, any extraordinary property losses and any related depreciation and amortization expense amounts.
_	Formula amounts for all of the foregoing items will remain at \$0 until approved by FERC under a separate docket.
F	Includes only transmission related or functionally booked as transmission and held for future use.
G	Cash Working Capital will be set at and remain \$0 until such time as SPS files and receives FERC approval for a lead/lag study.
Н	Equal to the balance of Network Facilities Upgrades Credits, net of accumulated depreciation, due transmission customers that made lump-sum payments towards the construction of Network Transmission Facilities consistent with Paragraph 657 of Order 2003-A. Excludes interest since interest is added to the revenue requirement on line 292.
1	The base plan upgrade revenue requirement will be updated annually based on actual data for the prior billing period. The updated revenue requirement will be
·	provided to the SPP no later than October 20 for billings effective January 1.
J	(Reserved for future use)
K	Includes all Regulatory Commission expense itemized in FERC Form 1 at 351.h. Show in Worksheet H how these expense items are assigned to transmission.
	FERC Assessment Fees, General Advertising, and Industry Association Dues and Research and Developments costs recorded in 930.2 shall not be assigned
	to transmission. A & G expenses shall Include specific transmission safety-related advertising and transmission siting advertising costs.
	The annual PBOP expense amount will be based on the PBOP expense amount reported in SPS's most recent annual actuarial valuation report as of
	the date of SPS's Annual Update. SPS will provide a copy of that actuarial report as part of its Annual Update and its Annual Informational Filing to the Commission
	NERC fees recorded in Acct. 928, Regulatory Commission Expenses, or in Acct. 165, Prepayments, shall be excluded from the formula.
L	Includes only FICA, unemployment, highway, property and other assessments charged in the current year. Gross receipts tax, taxes related to income,
	retail and non-transmission related taxes are excluded.
M	The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p =
	"the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state, it must attach a
	work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that
	elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce
	rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f)
	(In 287) multiplied by (1/1-T). If the applicable tax rates are zero enter 0.
	Inputs Required: FIT = 21.00%
	SIT= (Worksheet L) 2.17% (State Income Tax Rate or Composite SIT)
	p = 0.00% (percent of FIT deductible for state purposes)
N	Removes the dollars of plant booked to transmission plant that is excluded from the Tariff because it does not meet the Tariff's definition of Transmission
	Facilities, or is booked to transmission (e.g. step-up transformers) that is included in the development of OATT ancillary service rates, or is otherwise not eligible to be recovered under this Tariff.
0	Enter dollar amounts. Includes service company labor. Does not include contract labor.
Р	Includes the amortization of any excess/deficient deferred income taxes resulting from changes to income tax laws, income tax rates

	2	Less: Load Dispatch - Scheduling, System Control and Dispatch Services	WsG - Acct 561.4	\$3,492,107
	3	Less: Transmission Service Studies	WsG - Acct 561.6	\$203,333
	4	Less: Generation Interconnection Studies	WsG - Acct 561.7	\$154,843
	5	Less: Load Dispatch - Reliability, Planning & Standards Development Services	WsG - Acct 561.8	\$1,462,186
	6	Total 561 Costs for Projected Schedule 1 ARR	(Ln 1 - Sum of Lines 2 through 5)	\$4,055,660
	7	Less: Schedule 1 Point to Point Projected Revenues	WsB Rev Credits	\$143,416
	8	Projected Schedule 1 ARR Without True-up Adjustments	(Ln 6 - Ln 7)	\$3,912,244
	9 10	Prior Year True-up Adjustment Interest On Prior Year True-up Adjustment	Input from Prior Year True-up Input from Prior Year	(\$1,009,464) (\$84,792)
	11	Projected Schedule 1 ARR	(Ln 8 + Ln 9 + Ln 10)	\$2,817,988
В.	Schedule 12	<u> 1 Rate Calculations</u> Projected Average 12-Mo. Demand	WsC Divisor	4,518,000 kW
	13	Monthly Point to Point Rate in \$/kW - Month	((Line 11 /Line 12) /12)	\$0.052 kW
	14	Weekly Point to Point Rate in \$/kW - Weekly	((Line 11 /Line 12) /52)	\$0.012 kW
	15	Daily Point to Point Rate in \$/kW - Day	((Line 11 /Line 12) /365)	\$0.002 kW
	16	Hourly Point to Point Rate in \$/mW - Hourly	((Line 11 /Line 12) /8760 * 1000)	\$0.071 mW
	17	**SECTIONS C AND D USED ONLY FOR TRUE-UP, ANNUAL UPDATE WILL BE BLANK**		
C.	Schedule 18	1 - Actual ARR for the Billing Period 01/01/2022 to 12/31/2022	WsG OM - WS	\$10.404.434
	19	Total Load Dispatch and Scheduling (Account 561) Less: Load Dispatch - Scheduling, System Control and Dispatch Services	WsG - Acct 561.4	\$4,267,354
	20	Less: Transmission Service Studies	WsG - Acct 561.6	\$86,723
	21	Less: Generation Interconnection Studies	WsG - Acct 561.7	\$102,138
	22	Less: Load Dispatch - Reliability, Planning & Standards Development Services	WsG - Acct 561.8	\$2,912,813
	23	Total 561 Costs for Actual Schedule 1 ARR	(Ln 18 - Sum of Lines 19 through 22)	\$3,035,406
	24	Less: Schedule 1 Point to Point Actual Revenues Billed	WsB Rev Credits	\$201,404
	25	Actual Schedule 1 ARR	(Ln 23 - Ln 24)	\$2,834,002
		from Billing Period to be Included in Projected Schedule 1 ARR:		
	26	Revenue Requirement True-Up:		
	27	Actual Schedule 1 ARR calculated above	(Ln 25)	\$2,834,002
	28 29	Projected Schedule 1 ARR calculated above ARR True-up Amount (Over recovery = credit; under recovery = debit)	(Ln 8)	(\$1,078,242)
	29	ARR True-up Amount (Over recovery – credit, under recovery – debit)	(Ln 27 - Ln 28)	(\$1,078,242)
	30	Volume True-Up:		
	31	Actual Divisor Load for the Billing Period	WsC Divisor	4,832,000 kW
	32	Projected Divisor Load for the Billing Period	(Ln 12)	4,518,000 kW
	33	Volume Adjustment	(Ln 32 - Ln 31)	(314,000)
	34	Projected Zonal Rate per kw-yr for the Billing Period	(Ln 28 / Ln 32)	\$0.8659
	35	Actual Zonal Rate per kw-yr for the Billing Period	(Ln 27 / Ln 31)	\$0.5865
	36	Volume Revenue Adjustment (Over recovery = credit; under recovery = debit)	(Ln 33 * Ln 34)	(\$271,900)
	37	Net Schedule 1 True-up Adjustment (Over Recovery = credit; under recovery = debit)	(Ln 29 + Ln 36)	(\$1,350,142)
	38	Interest True-up Amount	(Ln 68)	(\$139,344)

84	Description of Revenue	Types											

Description of Revenue Types:

85 Ancillary Ancillary services includes regulation & frequency, control & dispatch, voltage 86

control, reactive, spinning reserve, scheduling and generation step-up.

87 Load associated with these revenues are included in the formula divisor. Divisor

88 Credit Revenue credit because load not included in divisor.

Note 2 - SPP point to point revenues are being revenue credited here because SPP will not revenue credit these revenues to LSEs.

NOTES

- 1) Column J is the difference between projected monthly and actual monthly activity (Column I minus Column F). Specifically, if projected and actual activity are both positive, a
- 2) Column K preserves proration when actual monthly and projected monthly activity are either both increases or decreases. Specifically, if Column J is over-projected, enter
- 3) Column L applies when (1) Column J is under-projected AND (2) actual monthly and projected monthly activity are either both increases or decreases. Enter the amount from
- 4) Column M applies when (1) projected monthly activity is an increase while actual monthly activity is a decrease OR (2) projected monthly activity is a decrease while actual
- 5) Column N is computed by adding the prorated monthly activity, if any, from Column K to 50 percent of the portion of monthly activity, if any, from Column L or M to the balance
- 6) The methodolgy to remove double averaging from the true-up ADIT Proration calculation is effective June 27, 2018.
- 7) Excess/deficient ADIT resulting from the enactment of the Tax Reform and Jobs Act is included beginning January 1, 2018 (with the 2018 True-Up)

283	Liberalized Depreciation - Software	(161,248)				(161,248)		This item reflects ADIT on method/life depreciation differences between book basis plant in service and tax basis plant in service of computer software only.
283	Liberalized Depreciation - Software Electric Intangible	(19,421,974)				(19,421,974)		This item reflects ADIT on method/life depreciation differences between book basis plant in service and tax basis plant in service of computer software only.
283	SchM-107 - Pension Expense	(34,382,459)	(34,382,459)					This item reflects ADIT on the net temporary timing difference between pension expense accrued and the actual cash funding of the trust. Since SPS did not include the prepaid pension asset in rate base, it has excluded ADIT on pension expense.
283	SchM-128 - Book Unamort. Cost Of Reacquired Debt	(4,403,513)			(4,403,513)			This item reflects ADIT on the net temporary timing difference between the costs of reacquiring debt deducted for tax purposes and the cost of reacquiring debt deducted for book purposes.
283	SchM-138 - Rate Case Expense	(8,366,941)	(8,366,941)					This item reflects ADIT on the net temporary timing difference between rate case/restructuring costs deducted for tax purposes and rate case/restructuring costs deducted for book purposes.
283	SchM-146 - State Tax Deduction Cash Vs Accrual - 190	-			-			This item reflects ADIT on the temporary timing difference between state income taxes accrued and state income taxes paid.
283	SchM-147 - State Tax Deduction Cash Vs Accrual - 283	(368,309)	-		(368,309)			This item reflects ADIT on the temporary timing difference between state income taxes accrued and state income taxes paid.
283	SchM-179 - DSM/CIP	-	-					This item reflects ADIT on the net temporary timing difference between net interest income on proposed audit adjustments that have been charged to book income and deducted for tax purposes, but cash has not yet been received.
	SchM-186 - Deferred Fuel Costs	(3,072,743)	(3,072,743)					This item reflects the ADIT resulting from the net temporary timing difference between inclusion of cost for electric generation and eventual recovery of costs from customers.
283	SchM-187 - Reg Asset/Liability Transmission Attachment O	(305,072)	(305,072)					This item reflects ADIT on the net temporary liming difference between the calculation of rates and recovery of rates for the FERC Transmission formula rates.
283	SchM-189 - OCI Treasury SchM-192 - Texas Margin Tax	(112,956)	(112,956)					Texas Gross Margin Tax – For book purposes, per Statement of Financial Accounting Standards (FAS) No. 109 (Accounting for Income Taxes), regulated enterprises are required to adjust a deferred tax liability or asset for enacted changes in tax rates (i.e., ADIT balances must be calculated using the most recent income tax rates in effect as of the balance sheet date). Since under GAAP, the Texas Gross Margin Tax is considered an income tax, this ADIT balances reflects the difference between deferred taxes calculated on selected non-plant timing differences at a composite rate incorporating the Texas Gross Margin tax (apportionment and rate) and deferred taxes calculated on selected non-plant timing differences at a composite rate excluding the Texas Gross Margin tax (apportionment and rate).
283	SchM-195 - Renewable Energy Standard	(976,236)	(976,236)					For book purposes the value (real or imputed) of renewable energy certificates (REC) acquired from various windpower producers are recorded as an offset to deferred costs which are set for recovery from customers, this offset to deferred cost expense is then held in inventory until such time as it is also recovered from customers. These REC's may also be sold to other companies which need them to meet state mandates for renewable energy.
283	SchM-275 - Reg Asset - Miscellaneous	(7,798,300)	(7,798,300)					SPS has certain regulatory recovery mechanisms that are tax sensitive. For book purposes, income is accrued to a regulatory asset and then amortized off as collected from customer bills. For tax purposes, under C.F.R. § 1.451-1(a), income is recognized when SPS collects this rate increase in customer bills.
283	SchM-293 - Rate Change	-						In September 2014, SPS received final orders allowing a rate increase effective retroactively to June 2014. For book purposes, income was accrued in 2014 and will be amoritzed off as collected from customer bills. For tax purposes, under Reg. § 1.451-1(a), income is recognized when SPS collected this rate increase in customer bills.
283	SchM-299 - Operating Lease	(99,869,968)	(99,869,968)					SPS adopted the leasing guidance under ASC 842 on January 1, 2019 which states that PPAs should be included in lease payments for classification and measurement purposes. As a result of the guidance, SPS recognized a right-of-use asset for book purposes. This change in accounting treatment results in a book/tax timing difference. Correspondingly, SPS records a deferred tax liability to FERC 283 related to the right-of-use asset.
283	SchM-300 - Reg A/L - Emergency Spec Response	(406,209)	(406,209)					For book purposes, the deferral of costs directly related to the pandemic are allowed for future recovery, per the Public Utility Commission of Texas - Project No. 50664. For tax purposes, these expenses are recognized as incurred.

190	Basis Difference - Production	13,768,230	13,768,230					This item reflects ADIT on tax only originating timing differences for avoided cost interest, pension and benefits capitalized, and ESOP dividends capitalized.
190	Basis Difference - General	1,036,822				1,036,822		This item reflects ADIT on tax only originating timing differences for avoided cost interest, pension and benefits capitalized, and ESOP dividends capitalized.
190	Basis Difference - Intangible	1,810				1,810		This item reflects ADIT on tax only originating timing differences for avoided cost interest, pension and benefits capitalized, and ESOP dividends capitalized.
190	Basis Difference - CIAC Distribution	21,174,966	21,174,966					This item reflects ADIT on tax only originating timing difference for taxable Contributions In Aid of Construction (CIAC).
190	Basis Difference - CIAC Transmission	12,181,244		12,181,244				This item reflects ADIT on tax only originating timing difference for taxable Contributions In Aid of Construction (CIAC).
190	Basis Difference - CIAC Production	15,603	15,603					This item reflects ADIT on tax only originating timing difference for taxable Contributions In Aid of Construction (CIAC).
190	Basis Difference - CIAC General	8,750				8,750		This item reflects ADIT on tax only originating timing difference for taxable Contributions In Aid of Construction (CIAC).
190	Basis Difference - CIAC Elec Non Utility	12,736,048	12,736,048					This item reflects ADIT on tax only originating timing difference for taxable Contributions In Aid of Construction (CIAC).
190	SchM-265 - Federal Only NOL - General	5,262,939				5,262,939		This item reflects the deferred tax asset resulting from SPS's allocated portion of the federal NOL's classified as general.
190	SchM-264 - Federal Only NOL - Transmission	19,551,780		19,551,780				This item reflects the deferred tax asset resulting from SPS's allocated portion of the federal NOL's classified as transmission.
190	SchM-102 - Fuel Tax Credit - Inc Addback	1,493			1,493			This item adds back to income the amount of the credit claimed for federal tax paid on fuels used in off-road equipment.
	SchM-103 - Environmental Remediation	2,925	2,925					For book purposes the costs incurred in the clean-up of various company and non-company sites from hazardous substances are accumulated and amortized over a period authorized by the PUC, generally 36 months. Per IRS Code Section 198, a taxpayer may elect to treat any qualified environmental remediation expenditure which is paid or incurred by the taxpayer as an expense which is not chargeable to a capital account. Any expenditure which is so treated shall be allowed as a deduction for the taxable year in which it is paid or incurred.
190	SchM-108 - Accrued Vacation Paid	1,016,350				1,016,350		For book purposes, the vacation liability is charged to book expense as employees earn vacation time. For tax purposes, a deduction can be claimed only when the vacation is actually taken unless it is taken within 2.5 months of the end of the accrual year. This item reverses the book vacation accrual for the current year, and takes as a deduction the amount of vacation pay actually used during the year plus the following 2.5 months.
190	SchM-109 - Employee Incentive	724,130				724,130		This item reflects the ADIT resulting from the net temporary difference on the incentives paid to employees accrued in one year and paid is the subsequent year.
190	SchM-111 - Post Employment Benefits - FAS 106(Short Term)	2,265,178	2,265,178					This item reflects the net of the OPEB expenses and contributions (added back to taxable income) and OPEB funding and distributions (which are deducted).
190	SchM-112 - Post Employment Benefits FAS 112	41,038				41,038		This pertains to long-term disability (LTD) benefits. Expenses accrued for book purposes are credited to a liability account and associated payments are debited to this account. For tax purposes, a deduction is allowed for payments charged to this liability account. This item reflects the current year changes to the LTD liability account (increase in the account balance are added to taxable income and decreases in the account balance are deducted from taxable income).
190	SchM-116 - Bad Debt	1,950,842	1,950,842					Book expense includes the amount of expected uncollectible accounts receivable. For tax purposes, only those uncollectible accounts receivable actually written off are deductible. This item reflects the net of the bad debt provision (added back to taxable income) and uncollectible accounts receivable
190	SchM-118 - Inventory Reserve	72,581	72,581					actually written off (which are deducted from taxable income.) This item is the difference between the book accrual (which is an addition to
190	SchM-119 - Electric Vehicle Credit	3,750			3,750			taxable income) and write offs (deductions from taxable income). This item reflects the deferred tax asset resulting from the excess or unused Electric Vehicle Credit. This item will be reversed at such time that the consolidated income tax liability becomes great enough to begin using
190	SchM-127 - Litigation Reserve	22,256	22,256					carryforward credits. This item reflects the ADIT resulting from the net temporary timing differences between book recognition of possible outcomes from litigation and the actual payments made.

(A)	(B)	(C) Avg Balance	(D) Retail, Production & Other	(E)	(F) Plant	(G) Labor	(H) Total Included in Ratebase	(1)
Acc. No.	Identification	from WsD	Related	Related	Related	Related	(E)+(F)+(G)	<u>Description</u>
190 SchM-13	0 - Deferred Compensation Plan Reserve	1,305,897				1,305,897		For book purposes, costs are accrued for a retirement plan for officers and certain key employees and currently charged against book income. Payments made to these retirees from the SERP Trust are not charged against book income but rather they are charged against the Trust account. IRC Section 404(a) allows a deduction to the employer for amounts paid to employees (retirees) in the year that the payment is includable in the employees (retirees) gross income. This amount is the net of the accrual (added back to taxable income) and payments (which are deducted from taxable income).
190 SchM-13	4 - Non-Qualified Pension Plans - 190	89,189				89,189		For book purposes an accrual is made to expense the supplemental compension for executives as instructed by FAS 158. Employers' Accounting for Defined Benefit Plans and Other Postretirement Plans using short-term and long-term OCI; and for the utilities the amounts that are recoverable through the rate process and not currently in income are recorded as regulatory assets and regulatory liabilities. Periodic funds to the plans are made with a debit to these accounts and credits to cash. Per IRS Code Sec. 404(a) a deduction is allowed to the employer when payments are made.
190 SchM-13	6 - Performance Share Plan	112,950				112,950		For book purposes, the Performance Share Plan (performance awards are granted at the beginning of a three-year cycle) expense is recorded currently over the plan period with a concurrent entry to liability accounts (short-term) and (long-term) and paid out at the end of the performance cycle. Per IRS Code Sec. 53(h) there shall be a deduction allowed under section 162 for the taxable year of the employer in which the option is exercised and value of such option is induced in the taxable income of the employee. In addition, any cash settlement is deductible under section 162 in the year of payment per IRS Code Sec. 461.
190 SchM-13	i7 - R&E Credit	12,523,322	12,523,322					This item reflects the deferred tax asset resulting from the excess or unused Increased Research Expenditures ("R&E") Credit. This item will be reversed at such time that the consolidated income tax liability becomes great enough to begin using carryforward credits.
190 SchM-14	6 - State Tax Deduction Cash Vs Accrual - 190	107,070			107,070			This item reflects ADIT on the temporary timing difference between state income taxes accrued and state income taxes paid.
190 SchM-15	2 - Rate Refund	497,123	497,123					Book revenue is adjusted currently for estimated amounts that will be refunded to customers in the future. For tax purposes, only refunds actually made to customers are deductions. This tax adjustment reverses the book income adjustments.
190 SchM-17	4 - New Hire Retention Credit	5,500				5,500		This item adds back to income the amount of the credit claimed for federal tax purposes.
190 SchM-17	8 - Interest Income on Disputed Tax	406,359	406,359					This item reflects ADIT on the net temporary timing difference between net interest income on proposed audit adjustments that have been charged to book income and deducted for tax purposes, but cash has not yet been received.
190 SchM-17	9 - DSM/CIP	335,181	335,181					This item reflects ADIT on the net temporary timing difference between DSM expenditures being deducted for tax purposes and those DSM expenditures being expensed/amortized for book.
	6 - Deferred Fuel Costs	2,268,745	2,268,745					This item reflects the ADIT resulting from the net temporary timing difference between inclusion of cost for electric generation and eventual recovery of costs from customers.
	7 - Reg Asset/Liability Transmission Attachment O	105,480	105,480					This item reflects ADIT on the net temporary timing difference between the calculation of rates and recovery of rates for the FERC Transmission formula rates.
190 SchM-18	8 - Contributions Carryover	33,280	33,280					For book purposes, charitable contributions are deducted currently from book income. For tax purposes, contributions are deductible subject to certain limitations. This item adds back to taxable income, contributions deemed to be in excess of such limitations. This timing difference will reverse at such time when taxable income is sufficient enough.

							T
190 SchM-189 - OCI Treasury	355,617	355,617					For book purposes, items reported in Other Comprehensive Income (OCI) on
							the balance sheet must be reported net of tax. One such item included in OCI
							for SPS relates to derivative instruments used to mitigate market risk and to enhance operations not qualifying for the normal purchases and normal sales
							exception, as defined by FAS No. 133 (Accounting for Derivative Instruments
							and Hedging Activities), which are recorded at fair value. This ADFIT amount
							reflects the taxes on OCI related to these types of derivative instruments.
190 SchM-205 - State Only NOL	2,248,856	2,248,856					This item reflects the deferred tax asset resulting from SPS's allocated portion
	_,,	_,,					of the following states NOLs for Oklahoma, New Mexico, and Oklahoma.
190 SchM-207 - Mark to Market Adjust	119,723	119,723					For book purposes, in complying with FASB Statement 133, "Accounting for
, and the second	· ·						Derivative Instruments and Hedging Activities", SPS has elected to treat most
							activity as balance sheet only (the "Settlement Basis") with entries being made
							between various asset and liability accounts and concurrent entries to other
							comprehensive income. However, with regards to wholesale regulated energy
							trading activities, SPS has elected "Mark to Market" accounting which requires
							periodic recognition of income or expense on the income statement with
							concurrent entries to asset accounts. For tax purposes, the Company has not
							elected to follow IRS Code Sec. 475, "Mark to market accounting method for
							dealers in securities". This reconciling item reverses the book amounts for "Mark to Market" income or expense for the current period.
190 SchM-226 - Performance Recognition Award	15,022				15,022		The recipient of a Performance Recognition Award has up to two years to use
190 Scriw-220 - Performance Recognition Award	15,022				15,022		the award. For book purposes, a liability is recorded on the books and reversed
							when the award is used. For tax purposes, per Reg. Sec. 1.461-1(a)(2)(i), the
							award is deductible when economic performance has occurred; therefore, a
							book/tax difference exists
190 SchM-261 - Section 59e Adjustment	13,492,532			13,492,532			This pertains to Section 174 R&E expenses. Expenses are capitalized and
	12,122,002			-,,			depreciated over the related assets useful life for book purposes. For tax
							purposes, these are allowed to be deducted straight-line over a 10 year period.
							This item reflects the difference between these two.
190 SchM-263 - Federal Only NOL - Production	6,014,787	6,014,787					This item reflects the deferred tax asset resulting from SPS's allocated portion
							of the federal NOL's classified as production.
190 SchM-266 - Federal Only NOL - Distribution	6,390,711	6,390,711					This item reflects the deferred tax asset resulting from SPS's allocated portion
400 O-hM 000 O	00,000,000	00.000.000					of the federal NOL's classified as distribution.
190 SchM-299 - Operating Lease	99,869,968	99,869,968					SPS adopted the leasing guidance under ASC 842 on January 1, 2019 which
							states that PPAs should be included in lease payments for classification and measurement purposes. As a result of the guidance, SPS recognized a right-of-
							use asset for book purposes. This change in accounting treatment results in a
							book/tax timing difference. Correspondingly, SPS records a deferred tax
							liability to FERC 283 related to the right-of-use asset.
190 SchM-PTC - Deferred PTCs - Hale	158,099,011	158,099,011					The federal renewable electricity production tax credit (PTC) is an inflation-
							adjusted per-kilowatt-hour (kWh) tax credit for electricity generated by qualified
							energy resources and sold by the taxpayer to an unrelated person during the
							taxable year. The credit is available for 10-years after the facility is placed in
							service. If the Company is unable to use its current year PTCs against its
							current year tax liability, PTCs may be carried forward for 20 years.
190 SchM-PTC - Deferred PTCs - Sagamore	89,145,524	89,145,524					The federal renewable electricity production tax credit (PTC) is an inflation-
							adjusted per-kilowatt-hour (kWh) tax credit for electricity generated by qualified energy resources and sold by the taxpayer to an unrelated person during the
							taxable year. The credit is available for 10-years after the facility is placed in
							service. If the Company is unable to use its current year PTCs against its
							current year tax liability, PTCs may be carried forward for 20 years.
							oan on your tax liability, i 100 may be carried forward for 20 years.

ADIT Account 283 Actual for Billing Year = 2022

(A)	(B)	(C)	(D) Retail. Production	(E)	(F)	(G)	(H) Total Included	(1)
Acc. No.	Identification	Avg Balance from WsD	& Other Related	Transmission Related	Plant Related	Labor <u>Related</u>	in Rate Base (E)+(F)+(G)	<u>Description</u>
283	Liberalized Depreciation - Software	(161,012)				(161,012)		This item reflects ADIT on method/life depreciation differences between book basis plant in service and tax basis plant in service of computer software only.
283	Liberalized Depreciation - Software Electric Intangible	(18,150,591)				(18,150,591)		This item reflects ADIT on method/life depreciation differences between book basis plant in service and tax basis plant in service of computer software only.
283	SchM-107 - Pension Expense	(33,507,833)	(33,507,833)					This item reflects ADIT on the net temporary timing difference between pension expense accrued and the actual cash funding of the trust. Since SPS did not include the prepaid pension asset in rate base, it has excluded ADIT on pension expense.
283	SchM-128 - Book Unamort. Cost Of Reacquired Debt	(4,418,663)			(4,418,663)			This item reflects ADIT on the net temporary timing difference between the costs of reacquiring debt deducted for tax purposes and the cost of reacquiring debt deducted for book purposes.
283	SchM-138 - Rate Case Expense	(9,146,582)	(9,146,582)					This item reflects ADIT on the net temporary timing difference between rate case/restructuring costs deducted for tax purposes and rate case/restructuring costs deducted for book purposes.
283	SchM-146 - State Tax Deduction Cash Vs Accrual - 190	(97,578)			(97,578)			This item reflects ADIT on the temporary timing difference between state income taxes accrued and state income taxes paid.
283	SchM-147 - State Tax Deduction Cash Vs Accrual - 283	-	-					
	SchM-179 - DSM/CIP	(1,889)	(1,889)					This item reflects ADIT on the net temporary timing difference between DSM expenditures being deducted for tax purposes and those DSM expenditures being expensed/amortized for book.
283	SchM-186 - Deferred Fuel Costs	(34,260,228)	(34,260,228)					This item reflects the ADIT resulting from the net temporary timing difference between inclusion of cost for electric generation and eventual recovery of costs from customers.

	0.111.402. D						
	SchM-187 - Reg Asset/Liability Transmission Attachment O	(77,069)	(77,069)				This item reflects ADIT on the net temporary timing difference between the calculation of rates and recovery of rates for the FERC Transmission formula rates.
283	SchM-189 - OCI Treasury	(600)	(600)				For book purposes, Items reported in Other Comprehensive Income (OCI) on the balance sheet must be reported net of tax. One such item included in OCI for SPS relates to derivative instruments used to mitigate market risk and to enhance operations not qualifying for the normal purchases and normal sales exception, as defined by FAS No. 133 (Accounting for Derivative Instruments and Hedging Activities), which are recorded at fair value. This ADFIT amount
283	SchM-192 - Texas Margin Tax	(852,434)	(852,434)				reflects the taxes on OCI related to these types of derivative instruments. Texas Gross Margin Tax – For book purposes, per Statement of Financial Accounting Standards (FAS) No. 109 (Accounting for income Taxes), regulated enterprises are required to adjust at deferred tax liability or asset for enacted changes in tax rates (i.e., ADIT balances must be calculated using the most recent income tax rates in effect as of the balance sheet date). Since under GAAP, the Texas Gross Margin Tax is considered an income tax, this ADIT balances reflects the difference between deferred taxes calculated on selected non-plant timing differences at a composite rate incorporating the Texas Gross Margin tax (apportionment and rate) and deferred taxes calculated on selected non-plant timing differences at a composite rate excluding the Texas Gross Margin tax (apportionment and rate) and deferred taxes calculated on selected non-plant timing differences at a composite rate excluding the Texas Gross Margin tax (apportionment and rate).
283	SchM-195 - Renewable Energy Standard	(380,172)	(380,172)				For book purposes the value (real or imputed) of renewable energy certificates (REC) acquired from various windopower producers are recorded as an offset to deferred costs which are set for recovery from customers, this offset to defered cost expense is then held in inventory until such time as it is also recovered from customers. These REC's may also be sold to other companies which need them to meet state mandates for renewable energy.
283	SchM-207 - Mark to Market Adjust	(325,131)	(325,131)				For book purposes, in complying with FASB Statement 133, "Accounting for Derivative Instruments and Hedging Activities", SPS has elected to treat most activity as balance sheet only (the "Settlement Basis") with entries being made between various asset and liability accounts and concurrent entries to other comprehensive income. However, with regards to wholesale regulated energy trading activities, SPS has elected "Mark to Market" accounting which requires periodic recognition of income or expense on the income statement with concurrent entries to asset accounts. For tax purposes, the Company has not elected to follow IRS Code Sec. 475, "Mark to market accounting method for dealers in securities". This reconciling item reverses the book amounts for "Mark to Market" income or expense for the current period.
283	SchM-275 - Reg Asset - Miscellaneous	(12,110,570)	(12,110,570)				SPS has certain regulatory recovery mechanisms that are tax sensitive. For book purposes, income is accrued to a regulatory asset and then amortized off as collected from customer bills. For tax purposes, under C.F.R. § 1.451.1(a), income is recognized when SPS collects this rate increase in customer bills.
	SchM-293 - Rate Change	(11,306,264)	(11,306,264)				This timing difference is the nonplant gross-up on the excess deferred tax balance related to TCJA that will be amortized back to customers. Amortization periods are determined by the Commission and determine the rate at which portions of this timing difference will reverse.
283	SchM-295 - Rate Change on Fin 48 Temp Items - Reg	1	1				This adjustment represents the federal TCJA rate change applied to temporary uncertain tax positions as reflected as a component of income tax expense.
	SchM-299 - Operating Lease	(100,213,027)	(100,213,027)				SPS adopted the leasing guidance under ASC 842 on January 1, 2019 which states that PPAs should be included in lease payments for classification and measurement purposes. As a result of the guidance, SPS recognized a right-of- use asset for book purposes. This change in accounting treatment results in a book/tax timing difference. Correspondingly, SPS records a deferred tax liability to FERC 283 related to the right-of-use asset.
283	SchM-300 - Reg A/L - Emergency Spec Response	(880,808)	(880,808)				For book purposes, the deferral of costs directly related to the pandemic are allowed for future recovery, per the Public Utility Commission of Texas - Project No. 50664. For tax purposes, these expenses are recognized as incurred.
283	Liberalized Depreciation - Non-Utility	(68,594)	(68,594)				Property basis difference resulting from accelerated tax depreciation versus book depreciation.

190	Basis Difference - CIAC Production	15,216	15,216					Contributions In Aid of Construction (CIAC). This item reflects ADIT on tax only originating timing difference for taxable
190	Basis Difference - CIAC General	8,749				8,749		Contributions In Aid of Construction (CIAC). This item reflects ADIT on tax only originating timing difference for taxable
			40.000.000			0,7 10		Contributions In Aid of Construction (CIAC).
	Basis Difference - CIAC Elec Non Utility	13,923,689	13,923,689					This item reflects ADIT on tax only originating timing difference for taxable Contributions In Aid of Construction (CIAC).
190	SchM-265 - Federal Only NOL - General	10,166				10,166		This item reflects the deferred tax asset resulting from SPS's allocated portion of the federal NOL's classified as general.
190	SchM-264 - Federal Only NOL - Transmission	7,251,409		7,251,409				This item reflects the deferred tax asset resulting from SPS's allocated portion of the federal NOL's classified as transmission.
190	SchM-102 - Fuel Tax Credit - Inc Addback	2,101			2,101			This item adds back to income the amount of the credit claimed for federal tax
190	SchM-103 - Environmental Remediation	233,569	233,569					paid on fuels used in off-road equipment. For book purposes the costs incurred in the clean-up of various company and
								non-company sites from hazardous substances are accumulated and amortized over a period authorized by the PUC, generally 36 months. Per IRS Code Section 198, a taxpayer may elect to treat any qualified environmental remediation expenditure which is paid or incurred by the taxpayer as an expense which is not chargeable to a capital account. Any expenditure which is so treated shall be allowed as a deduction for the taxable year in which it is paid or incurred.
190	SchM-108 - Accrued Vacation Paid	1,101,534				1,101,534		For book purposes, the vacation liability is charged to book expense as employees earn vacation time. For tax purposes, a deduction can be claimed only when the vacation is actually taken unless it is taken within 2.5 months of the end of the accrual year. This item reverses the book vacation accrual for the current year, and takes as a deduction the amount of vacation pay actually seed divine the over all we fellowing 3.6 months.
190	SchM-109 - Employee Incentive	734,844				734,844		used during the year plus the following 2.5 months. This item reflects the ADIT resulting from the net temporary difference on the incentives paid to employees accrued in one year and paid is the subsequent year.
190	SchM-111 - Post Employment Benefits - FAS 106(Short Term)	2,477,837	2,477,837					This item reflects the net of the OPEB expenses and contributions (added back to taxable income) and OPEB funding and distributions (which are deducted).
190	SchM-112 - Post Employment Benefits FAS 112	43,075				43,075		This pertains to long-term disability (LTD) benefits. Expenses accrued for book purposes are credited to a liability account and associated payments are debited to this account. For tax purposes, a deduction is allowed for payments charged to this liability account. This item reflects the current year changes to the LTD liability account (increase in the account balance are added to taxable income and decreases in the account balance are deducted from taxable income).
190	SchM-116 - Bad Debt	2,859,046	2,859,046					Book expense includes the amount of expected uncollectible accounts receivable. For tax purposes, only those uncollectible accounts receivable actually written off are deductible. This item reflects the net of the bad debt provision (added back to taxable income) and uncollectible accounts receivable actually written off (which are deducted from taxable income).
190	SchM-118 - Inventory Reserve	65,053	65,053					This item is the difference between the book accrual (which is an addition to
190	SchM-119 - Electric Vehicle Credit	3,750			3,750			taxable income) and write offs (deductions from taxable income). This item reflects the deferred tax asset resulting from the excess or unused Electric Vehicle Credit. This item will be reversed at such time that the consolidated income tax liability becomes great enough to begin using carryforward credits.
190	SchM-127 - Litigation Reserve	-				-		This item reflects the ADIT resulting from the net temporary timing differences between book recognition of possible outcomes from litigation and the actual payments made.
	SchM-130 - Deferred Compensation Plan Reserve	1,276,376				1,276,376		For book purposes, costs are accrued for a relitement plan for officers and certain key employees and currently charged against book income. Payments made to these retirees from the SERP Trust are not charged against book income but rather they are charged against the Trust account. IRC Section 404(a) allows a deduction to the employer for amounts paid to employees (retirees) in the year that the payment is includable in the employees (retirees) gross income. This amount is the rol of the accrual (added back to taxable income) and payments (which are deducted from taxable income).
190	SchM-134 - Non-Qualified Pension Plans - 190	85,521				85,521		For book purposes an accrual is made to expense the supplemental compension for executives as instructed by FAS 188 - Employers' Accounting for Defined Benefit Plans and Other Postretirement Plans using short-term and long-term OCI; and for the utilities the amounts that are recoverable through the rate process and not currently in income are recorded as regulatory assets and regulatory liabilities. Periodic funds to the plans are made with a debit to these accounts and credits to cash. Per IRS Code Sec. 404(a) a deduction is allowed to the employer when payments are made.

190	SchM-136 - Performance Share Plan	83,911			83,911	For book purposes, the Performance Share Plan (performance awards are
						granted at the beginning of a three-year cycle) expense is recorded current
						over the plan period with a concurrent entry to liability accounts (short-term
						and (long-term) and paid out at the end of the performance cycle. Per IRS
						Code Sec. 83(h) there shall be a deduction allowed under section 162 for
						taxable year of the employer in which the option is exercised and value of
						option is included in the taxable income of the employee. In addition, any
						settlement is deductible under section 162 in the year of payment per IRS
						Sec. 461.
190	SchM-137 - R&E Credit	13,463,207	13,463,207			This item reflects the deferred tax asset resulting from the excess or unus
						Increased Research Expenditures ("R&E") Credit. This item will be reverse
						such time that the consolidated income tax liability becomes great enough
						begin using carryforward credits.
190	SchM-146 - State Tax Deduction Cash Vs Accrual - 190	215,462		215,462		This item reflects ADIT on the temporary timing difference between state
						income taxes accrued and state income taxes paid.
190	SchM-152 - Rate Refund	1,909,390	1,909,390			Book revenue is adjusted currently for estimated amounts that will be refu
						to customers in the future. For tax purposes, only refunds actually made
						customers are deductions. This tax adjustment reverses the book incom
						adjustments.

190	SchM-171 - Employee Retention	1,010			1,010	For book purposes employee retention is expensed and accrued monthly. Cash payments to the employee are made at a later date provided the employee meets the service condition and certain performance conditions outlined in the employee retention agreement. Employee retention payments are not considered part of the employee's salary. For tax purposes, employee retention is deductible when paid or incurred under Reg. §1.461-1(a)(2)(i), which states that aliability is incurred and deductible in the year the all events test is met,
						which consists of the following criteria: 1) liability must be fixed as of the end of the year, 2) the amount must be determined with reasonable accuracy; and 3) economic performance has occurred. Since economic performance has not occurred at the end of the year, the tax deduction shall occur in the year the
190	SchM-174 - New Hire Retention Credit	5,500			5,500	payment is made. This item adds back to income the amount of the credit claimed for federal tax
190	SchM-178 - Interest Income on Disputed Tax	456,696	456,696			purposes. This item reflects ADIT on the net temporary timing difference between net interest income on proposed audit adjustments that have been charged to book income and deducted for tax purposes, but cash has not yet been received.
190	SchM-179 - DSM/CIP	93,401	93,401			This item reflects ADIT on the net temporary timing difference between DSM expenditures being deducted for tax purposes and those DSM expenditures being expenses/amortized for book.
190	SchM-186 - Deferred Fuel Costs	-	-			This item reflects the ADIT resulting from the net temporary timing difference between inclusion of cost for electric generation and eventual recovery of costs from customers.
190	SchM-187 - Reg Asset/Liability Transmission Attachment O	1,668,753	1,668,753			This item reflects ADIT on the net temporary timing difference between the calculation of rates and recovery of rates for the FERC Transmission formula rates.
190	SchM-188 - Contributions Carryover	32,131	32,131			For book purposes, charitable contributions are deducted currently from book income. For tax purposes, contributions are deductible subject to certain limitations. This item adds back to taxable income, contributions deemed to be in excess of such limitations. This timing difference will reverse at such time when taxable income is sufficient enough.
190	SchM-189 - OCI Treasury	316,586	316,586			For book purposes, liems reported in Other Comprehensive Income (OCI) on the balance sheet must be reported net of tax. One such item included in OCI for SPS relates to derivative instruments used to mitigate market risk and to enhance operations not qualifying for the normal purchases and normal sales exception, as defined by FAS No. 133 (Accounting for Derivative Instruments and Hedging Activities), which are recorded at fair value. This ADFIT amount reflects the taxes on OCI related to these types of derivative instruments.
190	SchM-195 - Renewable Energy Standard	580,932	580,932			For book purposes the value (real or imputed) of renewable energy certificates (REC) acquired from various windpower producers are recorded as an offset to deferred costs which are set for recovery from customers, this offset to defered cost expense is then held in inventory until such time as it is also recovered from customers. These REC's may also be sold to other companies which need them to meet state mandates for renewable energy.
190	SchM-205 - State Only NOL	2,656,345	2,656,345			This item reflects the deferred tax asset resulting from SPS's allocated portion of the following states NOLs for Oklahoma, New Mexico, and Oklahoma.
190	SchM-207 - Mark to Market Adjust					For book purposes, in complying with FASB Statement 133, "Accounting for Derivative Instruments and Hedging Activities", SPS has elected to treat most activity as balance sheet only (the "Settlement Basis") with entries being made between various asset and liability accounts and concurrent entries to other comprehensive income. However, with regards to wholesale regulated energy trading activities, SPS has elected "Mark to Market" accounting which requires periodic recognition of income or expense on the income statement with concurrent entries to asset accounts. For tax purposes, the Company has not elected to follow IRS Code Sec. 475, "Mark to market accounting method for dealers in securities". This reconciling item reverses the book amounts for "Mark to Market" income or expense for the current period.
190	SchM-226 - Performance Recognition Award	20,325			20,325	The recipient of a Performance Recognition Award has up to two years to use the award. For book purposes, a liability is recorded on the books and reversed when the award is used. For tax purposes, per Reg. Sec. 1461-1(a)(2)(1), the award is deductible when economic performance has occurred; therefore, a book/tax difference exists
190	SchM-261 - Section 59e Adjustment	14,216,754		14,216,754		Per IRS Code Sec. 461 the expenses for any amounts paid to retail customers for the Distributive Generation Program are deducted in the current tax year for taxable income.
	SchM-262 - Federal Only NOL - Non Operating	(356,615)	(356,615)			This item reflects the deferred tax asset resulting from SPS's allocated portion of the federal NOL's classified as non-operating.
	SchM-263 - Federal Only NOL - Production	27,024,254	27,024,254			This item reflects the deferred tax asset resulting from SPS's allocated portion of the federal NOL's classified as production.
	SchM-266 - Federal Only NOL - Distribution	2,269,573	2,269,573			This item reflects the deferred tax asset resulting from SPS's allocated portion of the federal NOL's classified as distribution.
190	SchM-293 - Rate Change	1,303,147	1,303,147			This timing difference is the nonplant gross-up on the excess deferred tax balance related to TCJA that will be amortized back to customers. Amortization periods are determined by the Commission and determine the rate at which portions of this timing difference will reverse.
190	SchM-299 - Operating Lease	100,213,027	100,213,027			portions of this timing unierence will reverse. SPS adopted the leasing guidance under ASC 842 on January 1, 2019 which states that PPAs should be included in lease payments for classification and measurement purposes. As a result of the guidance, SPS recognized a right-fuse asset for book purposes. This change in accounting treatment results in a book/tax timing difference. Correspondingly, SPS records a deferred tax liability to FERC 238 related to the right-of-use asset.
190	SchM-301 - Cares Act Payroll Deferral	268,104			268,104	Section 2302 of the CARES Act passed in 2020 provided that employers may defer the deposit and payment of the employer's portion of Social Security taxes. The deferral applies to deposits and payments of the employer's share of Social Security tax that would otherwise be required to be made during the period beginning on March 27, 2020, and ending December 31, 2020. 50% of these amounts are required to be paid by 12/31/2021 and the remaining 50% by 12/31/2022, which Benefits Accounting has confirmed is our treatitive plan for repayment. For book purposes, the employer's portion of FICA Social Security taxes are accrued as incurred. For tax purposes, these taxes are deductible as paid. This reconciling item adds back to taxable income the accrued book expenses that won't be paid until 2021. This timing difference creates a deferred tax asset for tax purposes.

190 SchM-PTC - Deferred PTCs - Hale	152,818,644	152,818,644					The federal renewable electricity production tax credit (PTC) is an inflation- adjusted per-kilowatt-hour (kWh) tax credit for electricity generated by qualified energy resources and sold by the taxpayer to an unrelated person during the taxable year. The credit is available for 10-years after the facility is placed in service. If the Company is unable to use its current year PTCs against its current year tax liability, PTCs may be carried forward for 20 years.
190 SchM-PTC - Deferred PTCs - Sagamore	77,833,337	77,833,337					The federal renewable electricity production tax credit (PTC) is an inflation- adjusted per-kilowatt-hour (kWh) tax credit for electricity generated by qualified energy resources and sold by the taxpayer to an unrelated person during the taxable year. The credit is available for 10-years after the facility is placed in service. If the Company is unable to use its current year PTCs against its current year tax liability, PTCs may be carried forward for 20 years.

Notes:

The Formula Rate shall include a credit to rate base for each unfunded reserve. An unfunded reserve is a reserve where an escrow, trust, or restricted account has not been established for a fund whose balance is collected from customers through cost accruals to accounts that are recovered under the Formula Rate. Each unfunded reserve will be included on the lines above. The allocator in Col. (9) will be the same allocator used in the Formula Rate for the cost accruals to the account that is recovered under the Formula Rate

Line

I. Calculate Return and Income Taxes with hypothetical 100 basis point ROE increase.

Line A. Determine "R" with hypothetical 100 basis point increase in ROE.

INU.					
1	ROE w/o incentive	s (From Page	e 5, In 162)		10.50%
2	ROE with additiona		11.50%		
3	Determine R (cos	t of long term	debt, cost of preferred stock and pe	ercent is from F	Page 5, Ins 160 through162)
4		<u>%</u>	<u>Cost</u>	<u>v</u>	Veighted cost
5	Long Term Debt	45.67%	0.0412		0.0188
6	Preferred Stock	0.00%	0.0000		0.0000
7	Common Stock	54.33%	0.1150		0.0625
Ω				P -	0.0813

B. Determine Return using "R" with hypothetical 100 basis point ROE increase.

9	Rate Base (From Page 3, In	2,687,332,383
10	R (from A. above)	0.0813
11	Return (Rate Base x R)	218,480,123

C. Determine Income Taxes using Return with hypothetical 100 basis point ROE increase.

12	Return (from B. above)	218,480,123
13	CIT (From Page 4, In 131)	22.01%
14	Income Tax Calculation (Ret	48,087,475
15	ITC Adjustment (From Page	-
16	Income Taxes	48,087,475

II. Calculate Net Plant Carrying Charge Rate (Fixed Charge Rate or FCR) with hypothetical 100 basis point ROE increase.

A. Determine Net Revenue Requirement less return and Income Taxes.

140.		
17	Net Revenue Requirement (From Page 2, In 33)	390,360,681
18	Return (From Page 4, In 139)	203,699,795
19	Income Taxes (From Page 4, In 138)	42,084,868
20	Net Revenue Requirement, Less Return and Taxes	144,576,019

B. Determine Net Revenue Requirement with hypothetical 100 basis point increase in ROE.

21	Net Revenue Requirement, Less Return and Taxes	144,576,019
22		218,480,123
23	Income Taxes (from I.C. above)	48,087,475
24	Net Revenue Requirement, with 100 Basis Point ROE increase	411,143,617
25	Depreciation (From Page 4, In 114)	90,184,496
26	Net Rev. Req, w/100 Basis Point ROE increase, less Depreciation	320,959,121

C. Determine FCR with hypothetical 100 basis point ROE increase.

27 28 29	Net Transmission Plant (From Page 3, In 62) Net Revenue Requirement, with 100 Basis Point ROE increase FCR with 100 Basis Point increase in ROE	3,182,704,641 411,143,617 12.92%	
30	Net Rev. Reg, w/100 Basis Point ROE increase, less Dep.	320,959,121	
31	FCR with 100 Basis Point ROE increase, less Depreciation	10.08%	(use when no CIAC is associated with facilities receiving incentives)
32	FCR w/o 100 Basis Point ROE increase, less Depreciation	9.43%	(From Page 2, In 40)
33	FCR w/o Return, Income Taxes and Depreciation	0.65%	(use when CIAC is associated with facilities receiving incentives)

Determine the Additional Revenue Requirement and Revenue Credit for facilities receiving incentives.

A. Facilities receiving incentives accepted by FERC in Docket No.

The calculated Additional Revenue Requirement and Revenue Credit shown below are only valid for Investment Years matching Current Year. Values prior and subsequent to the Current Year will change as Attachment O is updated. These changes will not result in a refund or additional charge related to years prior to the Current Year.

Beginning Balance = Investment in first year and prior year Ending Balance, thereafter Depreciation Expense = Straight line depreciation equal to Investment divided by Useful Life

Ending Balance = Beginning Balance - Depreciation Expense

Revenue Requirement = FCR * Beginning Balance plus Depreciation Expense, adjusted by Service Month divided by 12 in the first year

Additional Rev. Requirement = Revenue Requirement w/incentives less w/o incentive for the year

Additional Revenue Credit = Revenue Requirement w/o incentives

Investment	No.		Details

Determine the Additional Revenue Requirement and Revenue Credit for facilities receiving incentives. (cont.)

B. Facilities receiving incentives accepted by FERC in Docket No.

The calculated Additional Revenue Requirement and Revenue Credit shown below are only valid for Investment Years matching Current Year. Values prior and subsequent to the Current Year will change as Attachment O is updated. These changes will not result in a refund or additional charge related to years prior to the Current Year.

Beginning Balance = Investment in first year and prior year Ending Balance, thereafter Depreciation Expense = Straight line depreciation equal to Investment divided by Useful Life Ending Balance = Beginning Balance - Depreciation Expense Revenue Requirement = FCR * Beginning Balance plus Depreciation Expense, adjusted by Service Month divided by 12 in the first year Additional Rev. Requirement = Revenue Requirement w/incentives less w/o incentive for the year Additional Revenue Credit = Revenue Requirement w/o incentives
