For the Billing Period 01/01/2024 to 12/31/2024

SOUTHWESTERN PUBLIC SERVICE COMPANY

General Notes: a) References to data from FERC Form 1 are indicated as: page#.line#.col#.

0011014111	received any received to usual received and received and page minimum committee.	
Note		
Letter		
A	The revenues credited shall include amounts received directly from the SPP for service under this ta	riff reflecting SDS's integrated transmission facilities
^	Revenues associated with FERC annual charges, gross receipts taxes, ancillary services or other far	
	definition of transmission facilities under this tariff shall not be included as revenue credits. Revenue	
_	in the DIVISOR are also not included as revenue credits unless this revenue is offset by a correspon	
В	The annual and monthly net and gross plant carrying charges on page 2 are to be used to compute to	the revenue requirement for directly assigned facilities,
	any Base Plan Upgrades, distribution facilities, and radial lines.	
С	This additional revenue requirement is determined using a net plant carrying charge (fixed carrying c	
	of the additional revenue requirements for each project receiving incentive rate treatment, as accep	ted by FERC by a separate docket. These individual
	additional revenue requirements shall be summed, for the then current year, and included here.	
D	Reflects the transmission related portion of balances in Accounts 281, 282, 283, 190, and 255 as ad	justed by any amounts in contra accounts identified as
	regulatory assets or liabilities related to FASB 106, 109, 133,158 or FASB Interpretation No. 48. B	alance of Account 255 is reduced by prior flow throughs and
	completely excluded if the utility chose to utilize amortization of tax credits against taxable income	as discussed in Note M.
	The calculation of ADIT for both the true-up and the annual projection will be performed in accorda	nce with IRS regulation Section 1.167(I)-1(h)(6).
	The Annual True-Up for a given year will use the same methodology that was used to project that	., .,.,
	described on Table 21A of the template.)	
E	Includes any incentive Construction Work in Progress (CWIP), any related Allowance for Funds User	d During Construction (AFUDC), any unamortized balances
_	related to the recovery of abandoned incentive plant costs, any extraordinary property losses and ar	
	Formula amounts for all of the foregoing items will remain at \$0 until approved by FERC under a sep	
F	Includes only transmission related or functionally booked as transmission land held for future use.	sarato doston
G	Cash Working Capital will be set at and remain \$0 until such time as SPS files and receives FERC a	nnroval for a lead/lag study
Н	Equal to the balance of Network Facilities Upgrades Credits, net of accumulated depreciation, due tr	
	towards the construction of Network Transmission Facilities consistent with Paragraph 657 of Order	
	revenue requirement on line 140.	2000 7t. Exoluted interest since interest is under to the
1	The base plan upgrade revenue requirement will be updated annually based on actual data for the p	prior billing period. The undated revenue requirement will be
'	provided to the SPP no later than October 20 for billings effective January 1.	onor billing period. The apaaled revenue requirement will be
J	(Reserved for future use)	
K	,	Variabaat II hayy thaas ayramas itama ayra assirmad ta transmission
r.	Includes all Regulatory Commission expense itemized in FERC Form 1 at p. 350-351 (h). Show in V	,
	FERC Assessment Fees, General Advertising, and Industry Association Dues and Research and D	
	to transmission. A & G expenses shall Include specific transmission safety-related advertising and	
	The annual PBOP expense amount will be based on the PBOP expense amount reported in SPS's	·
	the date of SPS's Annual Update. SPS will provide a copy of that actuarial report as part of its Ann	
	NERC fees recorded in Acct. 928, Regulatory Commission Expenses, or in Acct. 165, Prepayment	
L	Includes only FICA, unemployment, highway, property and other assessments charged in the curren	t year. Gross receipts tax, taxes related to income,
	retail and non-transmission related taxes are excluded.	
M	The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State in	
	"the percentage of federal income tax deductible for state income taxes". If the utility is taxed in mo	
	work paper showing the name of each state and how the blended or composite SIT was developed	
	elected to utilize amortization of tax credits against taxable income, rather than book tax credits to A	
	rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Cre	edit (Form 1, 266.8.f)
	(In 135) multiplied by (1/1-T) . If the applicable tax rates are zero enter 0.	
	Inputs Required: FIT =	21.00%
	SIT= (Worksheet L)	2.26% (State Income Tax Rate or Composite SIT)
	p =	0.00% (percent of FIT deductible for state purposes)
N	Removes the dollars of plant booked to transmission plant that is excluded from the Tariff because it	does not meet the Tariff's definition of Transmission
	Facilities, or is booked to transmission (e.g. step-up transformers) that is included in the developme	ent of OATT ancillary service rates,
	or is otherwise not eligible to be recovered under this Tariff.	•
0	Enter dollar amounts. Includes service company labor. Does not include contract labor	

- 0 P Enter dollar amounts. Includes service company labor. Does not include contract labor.
 - Includes the amortization of any excess/deficient deferred income taxes resulting from changes to income tax laws, income tax rates (including changes in apportionment) and other actions taken by a taxing authority. Excess and deficient deferred income taxes will reduce or increase tax expense by the amount of the excess or deficiency multiplied by (1/(1-T)).

Utilizing FERC Form 1 Actual Data
For the Billing Period 01/01/2024 to 12/31/2024

SOUTHWESTERN PUBLIC SERVICE COMPANY

Constal Notes: a) References to data from EERC Form 1 are indicated as: paget linet celt

General N	Notes: a) References to data from FERC Form 1 are indicated as: page#.line#.col#.
Note	
Letter	
A	The revenues credited shall include amounts received directly from the SPP for service under this tariff reflecting SPS's integrated transmission facilities.
	Revenues associated with FERC annual charges, gross receipts taxes, ancillary services or other facilities revenues shall be excluded from the
	definition of transmission facilities under this tariff shall not be included as revenue credits. Revenue from coincident peak loads included
	in the DIVISOR are also not included as revenue credits unless this revenue is offset by a corresponding expense. See Worksheet B for details.
В	The annual and monthly net and gross plant carrying charges on page 7 are to be used to compute the revenue requirement for directly assigned facilities, any Base Plan Upgrades, distribution facilities, and radial lines.
С	This additional revenue requirement is determined using a net plant carrying charge (fixed carrying charge or FCR) approach. Worksheet R shows the calculation
	of the additional revenue requirements for each project receiving incentive rate treatment, as accepted by FERC by a separate docket. These individual
	additional revenue requirements shall be summed, for the then current year, and included here.
D	Reflects the transmission related portion of balances in Accounts 281, 282, 283, 190, and 255 as adjusted by any amounts in contra accounts identified as
	regulatory assets or liabilities related to FASB 106, 109, 133,158 or FASB Interpretation No. 48. Balance of Account 255 is reduced by prior flow throughs and
	completely excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note M.
	The calculation of ADIT for both the true-up and the annual projection will be performed in accordance with IRS regulation Section 1.167(I)-1(h)(6).
	The Annual True-Up for a given year will use the same methodology that was used to project that year's rates. (Except for ADIT Proration which is
Е	described on Table 21A of the template.) Includes any incentive Construction Work in Progress (CWIP), any related Allowance for Funds Used During Construction (AFUDC), any unamortized balances
L	riculates any interfitive Constituction work in Frogress (CVIIF), any telated annowance or units described by the recovery of abandoned incentive plant costs, any extraordinary property losses and any related depreciation and amortization expense amounts.
	Formula amounts for all of the foregoing items will remain at \$0 until approved by FERC under a separate docket.
F	Includes only transmission related or functionally booked as transmission land held for future use.
G	Cash Working Capital will be set at and remain \$0 until such time as SPS files and receives FERC approval for a lead/lag study.
Н	Equal to the balance of Network Facilities Upgrades Credits, net of accumulated depreciation, due transmission customers that made lump-sum payments
	towards the construction of Network Transmission Facilities consistent with Paragraph 657 of Order 2003-A. Excludes interest since interest is added to the
	revenue requirement on line 292.
1	The base plan upgrade revenue requirement will be updated annually based on actual data for the prior billing period. The updated revenue requirement will be
	provided to the SPP no later than October 20 for billings effective January 1.
J	(Reserved for future use)
K	Includes all Regulatory Commission expense itemized in FERC Form 1 at 350-351 (h). Show in Worksheet H how these expense items are assigned to transmission.
	FERC Assessment Fees, General Advertising, and Industry Association Dues and Research and Developments costs recorded in 930.2 shall not be assigned to transmission. A & G expenses shall Include specific transmission safety-related advertising and transmission siting advertising costs.
	to transmission. A & 6 expenses animinate specific transmission satery-related advertising and transmission study expense amount will be based on the PBOP expense amount reported in SPS's most recent annual actuarial valuation report as of
	the date of SPS's Annual Update. SPS will provide a copy of that actuarial report as part of its Annual Update and its Annual Informational Filing to the Commission
	NERC fees recorded in Acct. 928. Regulatory Commission Expenses, or in Acct. 165. Prepayments, shall be excluded from the formula.
L	Includes only FICA, unemployment, highway, property and other assessments charged in the current year. Gross receipts tax, taxes related to income,
	retail and non-transmission related taxes are excluded.
M	The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p =
	"the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state, it must attach a
	work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that
	elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce
	rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f)
	(In 287) multiplied by (1/1-T) . If the applicable tax rates are zero enter 0.
	Inputs Required: FIT = 21.00% (State Income Toy Rate or Comparity SIT)
	SIT= (Worksheet L) p = 0.00% (State Income Tax Rate or Composite SIT) p = 0.00% (percent of FIT deductible for state purposes)
N	Removes the dollars of plant booked to transmission plant that is excluded from the Tariff because it does not meet the Tariff definition of Transmission

Removes the dollars of plant booked to transmission plant that is excluded from the Tariff because it does not meet the Tariff's definition of Transmission Ν Facilities, or is booked to transmission (e.g. step-up transformers) that is included in the development of OATT ancillary service rates,

or is otherwise not eligible to be recovered under this Tariff. Enter dollar amounts. Includes service company labor. Does not include contract labor.

Includes the amortization of any excess/deficient deferred income taxes resulting from changes to income tax laws, income tax rates (including changes in apportionment) and other actions taken by a taxing authority. Excess and deficient deferred income taxes will reduce or increase tax expense by the amount of the excess or deficiency multiplied by (1/(1-T)). Amortizations of excess/deficent deferred income taxes resulting from the enactment of the Tax Reform and Jobs Act will be included beginning January 1, 2018 (with the 2018 True-Up)

41 Description of Revenue Types:

42 Ancillary Ancillary services includes regulation & frequency, control & dispatch, voltage
43 control, reactive, spinning reserve, scheduling and generation step-up.
44 Divisor Load associated with these revenues are included in the formula divisor.

45 Credit Revenue credit because load not included in divisor.

46 Note 2 - SPP point to point revenues are being revenue credited here because SPP will not revenue credit these revenues to LSEs

- 1) Column J is the difference between projected monthly and actual monthly activity (Column I minus Column F). Specifically, if projected and actual activity are both positive, a negative in Column J represents over-projection (amount of projected activity that did not occur) and a positive in Column J represents under-projection (excess of actual activity over projected activity). If projected and actual activity are both negative, a negative in Column J represents under-projection (excess of actual activity over projected activity) and a positive in Column J represents over-projection (amount of projected activity that did not occur).
- 2) Column K preserves proration when actual monthly and projected monthly activity are either both increases or decreases. Specifically, if Column J is over-projected, enter Column G x [Column I/Column F]. If Column J is under-projected, enter the amount from Column G and complete Column L). In other situations, enter zero.
- 3) Column L applies when (1) Column J is under-projected AND (2) actual monthly and projected monthly activity are either both increases or decreases. Enter the amount from Column J. In other situations, enter zero.
- 4) Column M applies when (1) projected monthly activity is an increase while actual monthly activity is a decrease OR (2) projected monthly activity is a decrease while actual monthly activity (CoI I). In other situations, enter zero.
- 5) Column N is computed by adding the prorated monthly activity, if any, from Column K to 50 percent of the portion of monthly activity, if any, from Column L or M to the balance at the end of the prior month. The activity in columns L and M is multiplied by 50 percent to reflect averaging of rate base to the extent that the proration requirement has not been applied to a portion of the monthly activity.
- 6) The methodolgy to remove double averaging from the true-up ADIT Proration calculation is effective June 27, 2018.
- 7) Excess/deficient ADIT resulting from the enactment of the Tax Reform and Jobs Act is included beginning January 1, 2018 (with the 2018 True-Up)

Acc. No.	Identification	Avg Balance from WsD	& Other Related	Transmission Related	Plant Related	Labor Related	in Rate Base (E)+(F)+(G)	<u>Description</u>
283	Liberalized Depreciation - Software	(152,649)				(152,649)		This item reflects ADIT on method/life depreciation differences between book basis plant in service and tax basis plant in service of computer software only.
283	Liberalized Depreciation - Software Electric Intangible	(18,134,170)				(18,134,170)		service and tax basis plant in service or computer software only. This item reflects ADIT on method/life depreciation differences between book basis plant in service and tax basis plant in service of computer software only.
283	Liberalized Depreciation - Non-Utility	(66,458)	(66,458)					This item reflects ADIT on method/life depreciation differences between book basis plant in service and tax basis plant in service of non-utility only.
283	SchM-107 - Pension Expense	(32,494,856)	(32,494,856)					This item reflects ADIT on the net temporary timing difference between pension expense accrued and the actual cash funding of the trust. Since SPS did not include the prepaid pension asset in rate base, it has excluded ADIT on pension expense.
283	SchM-128 - Book Unamort. Cost Of Reacquired Debt	(4,044,478)			(4,044,478)			This item reflects ADIT on the net temporary timing difference between the costs of reacquiring debt deducted for tax purposes and the cost of reacquiring debt deducted for book purposes.
283	SchM-138 - Rate Case Expense	(1,662,799)	(1,662,799)					This item reflects ADIT on the net temporary timing difference between rate case/restructuring costs deducted for tax purposes and rate case/restructuring costs deducted for book purposes.
283	SchM-147 - State Tax Deduction Cash Vs Accrual - 283	(195,156)			(195,156)			This item reflects ADIT on the temporary timing difference between state income taxes accrued and state income taxes paid.
283	SchM-168 - Reg Asset-NOx	(212,264)	(212,264)					For book purposes the deferral of the allowances expensed concurrent with the monthly emission of nitric oxide / nitrogen dioxide (NOx) in New Mexico as allowed in the 2011 New Mexico Rate Case. For tax purposes expense of the allowances are recognized as incurred.
	SchM-178 - Interest Income on Disputed Tax	-	-					This item reflects ADIT on the net temporary timing difference between net interest income on proposed audit adjustments that have been charged to book income and deducted for tax purposes, but cash has not yet been received.
284	SchM-179 - DSM/CIP	(1,868)	(1,868)					This item reflects ADIT on the net temporary timing difference between DSM expenditures being deducted for tax purposes and those DSM expenditures being expensed/amortized for book.
283	SchM-186 - Deferred Fuel Costs	(3,431,193)	(3,431,193)					This item reflects ADIT on the net temporary timing difference between the calculation of rates and recovery of rates for the FERC Transmission formula rates.
283	SchM-187 - Reg Asset/Liability Transmission Attachment O							For book purposes, items reported in Other Comprehensive Income (OCI) on the balance sheet must be reported net of tax. One such item included in OCI for SPS relates to derivative instruments used to mitigate market risk and to enhance operations not qualifying for the normal purchases and normal sales exception, as defined by FAS No. 133 (Accounting for Derivative Instruments and Hedging Activities), which are recorded at fair value. This ADFIT amount reflects the taxes on OCI related to these types of derivative instruments.
283	SchM-189 - OCI Treasury	(601)	(601)					For book purposes the value (real or imputed) of renewable energy certificates (REC) acquired from various windpower producers are recorded as an offset to deferred costs which are set for recovery from customers, this offset to deferred cost expense is then held in inventory until such time as it is also recovered from customers. These REC's may also be sold to other companies which need them to meet state mandates for renewable energy.
283	SchM-192 - Texas Margin Tax	(853,330)	(853,330)					This item reflects ADIT on the temporary timing difference between state income taxes accrued and state income taxes paid.
283	SchM-195 - Renewable Energy Standard							For book purposes, in complying with FASB Statement 133, "Accounting for Derivative Instruments and Hedging Activities", SPS has elected to treat most activity as balance sheet only (the "Settlement Basis") with entries being made between various asset and liability accounts and concurrent entries to other comprehensive income. However, with regards to wholesale regulated energy trading activities, SPS has elected "Mark to Market" accounting which requires periodic recognition of income or expense on the income statement with concurrent entries to asset accounts. For tax purposes, the Company has not elected to follow IRS Code Sec. 475, "Mark to market accounting method for dealers in securities". This reconciling item reverses the book amounts for "Mark to Market" income or expense for the current period.
283	SchM-201 - State Tax Deduction Cash vs Accrual - Fin 48	-	-					In September 2014, SPS received final orders allowing a rate increase effective retroactively to June 2014. For book purposes, income was accrued in 2014 and will be amortized off as collected from customer bills. For tax purposes, under Reg. § 1.451-1(a), income is recognized when SPS collected this rate increase in customer bills.
283	SchM-207 - Mark to Market Adjust	(473,668)	(473,668)					The Tax Cuts and Jobs Act was passed on 12/22/2017. The law lowered the federal tax rate from 35% to 21%. Accordingly, SPS's deferred tax assets and deferred tax liabilities were restated to the new 21% rate. A portion of the total rate change will be collected through rates and is therefore on SPS's books as a regulatory asset, including a gross-up.
283	SchM-275 - Reg Asset - Miscellaneous	(2,577,706)	(2,577,706)					This item is the temporary timing difference associated with Federal NOL differences in rates between the unrecognized tax benefits (35%) vs accumulated deferred income taxes (21%) and will reverse when the underlying FIN 48 differences are reversed.
	SchM-299 - Operating Lease	(86,438,393)	(86,438,393)					SPS has certain regulatory recovery mechanisms that are tax sensitive. For book purposes, income is accrued to a regulatory asset and then amortized off as collected from customer bills. For tax purposes, under C.F.R. § 1.451-1(a), income is recognized when SPS collects this rate increase in customer bills.
	SchM-300 - Reg A/L - Emergency Spec Response	(707,133)	(707,133)					SPS adopted the leasing guidance under ASC 842 on January 1, 2019 which states that PPAs should be included in lease payments for classification and measurement purposes. As a result of the guidance, SPS recognized a right-of-use asset for book purposes. This change in accounting treatment results in a book/tax timing difference. Correspondingly, SPS records a deferred tax liability to FERC 283 related to the right-of-use asset.

190	Basis Difference - CIAC Elec Non Utility	16,189,056	16,189,056					This item reflects ADIT on tax only originating timing difference for taxable Contributions In Aid of Construction (CIAC).
190	SchM-102 - Fuel Tax Credit - Inc Addback	1,150			1,150			This item adds back to income the amount of the credit claimed for federal tax paid on fuels
190	SchM-103 - Environmental Remediation	12,892	12,892					used in off-road equipment. For book purposes the costs incurred in the clean-up of various company and non-company
		,	.=,***					sites from hazardous substances are accumulated and amortized over a period authorized
								by the PUC, generally 36 months. Per IRS Code Section 198, a taxpayer may elect to treat any qualified environmental remediation expenditure which is paid or incurred by the
								taxpayer as an expense which is not chargeable to a capital account. Any expenditure which
								is so treated shall be allowed as a deduction for the taxable year in which it is paid or incurred.
190	SchM-108 - Accrued Vacation Paid	1,158,173				1,158,173		For book purposes, the vacation liability is charged to book expense as employees earn vacation time. For tax purposes, a deduction can be claimed only when the vacation is
								actually taken unless it is taken within 2.5 months of the end of the accrual year. This item
								reverses the book vacation accrual for the current year, and takes as a deduction the amount of vacation pay actually used during the year plus the following 2.5 months.
190	SchM-109 - Employee Incentive	759,676				759,676		This item reflects the ADIT resulting from the net temporary difference on the incentives paid
190	SchM-111 - Post Employment Benefits - FAS 106(Short To	2,363,098	2,363,098					to employees accrued in one year and paid is the subsequent year. This item reflects the net of the OPEB expenses and contributions (added back to taxable
190	SchM-112 - Post Employment Benefits FAS 112	14,970				14,970		income) and OPEB funding and distributions (which are deducted). This pertains to long-term disability (LTD) benefits. Expenses accrued for book purposes are
	, ,							credited to a liability account and associated payments are debited to this account. For tax
								purposes, a deduction is allowed for payments charged to this liability account. This item reflects the current year changes to the LTD liability account (increase in the account
								balance are added to taxable income and decreases in the account balance are deducted from taxable income).
190	SchM-116 - Bad Debt	2,908,814	2,908,814					Book expense includes the amount of expected uncollectible accounts receivable. For tax
								purposes, only those uncollectible accounts receivable actually written off are deductible. This item reflects the net of the bad debt provision (added back to taxable income) and
								uncollectible accounts receivable actually written off (which are deducted from taxable
190	SchM-118 - Inventory Reserve	65.819	65.819					income.) This item is the difference between the book accrual (which is an addition to taxable income)
	-	00,010	00,010					and write offs (deductions from taxable income).
190	SchM-119 - Electric Vehicle Credit	-			-			This item reflects the deferred tax asset resulting from the excess or unused Electric Vehicle Credit. This item will be reversed at such time that the consolidated income tax liability
400	0.144.407.176.07	312,810	312,810					becomes great enough to begin using carryforward credits. This item reflects the ADIT resulting from the net temporary timing differences between book
	SchM-127 - Litigation Reserve	· ·	312,810					recognition of possible outcomes from litigation and the actual payments made.
190	SchM-130 - Deferred Compensation Plan Reserve	1,253,940				1,253,940		For book purposes, costs are accrued for a retirement plan for officers and certain key employees and currently charged against book income. Payments made to these retirees
								from the SERP Trust are not charged against book income but rather they are charged
								against the Trust account. IRC Section 404(a) allows a deduction to the employer for amounts paid to employees (retirees) in the year that the payment is includable in the
								employees (retirees) gross income. This amount is the net of the accrual (added back to
190	SchM-134 - Non-Qualified Pension Plans - 190	72,790			_	72,790		taxable income) and payments (which are deducted from taxable income). For book purposes an accrual is made to expense the supplemental compension for
								executives as instructed by FAS 158 - Employers' Accounting for Defined Benefit Plans and
								Other Postretirement Plans using short-term and long-term OCI; and for the utilities the amounts that are recoverable through the rate process and not currently in income are
								recorded as regulatory assets and regulatory liabilities. Periodic funds to the plans are made with a debit to these accounts and credits to cash. Per IRS Code Sec. 404(a) a deduction is
								allowed to the employer when payments are made.

190	SchM-136 - Performance Share Plan	114,303				114,303		For book purposes, the Performance Share Plan (performance awards are granted at the beginning of a three-year cycle jexpense is recorded currently over the plan period with concurrent entry to liability accounts (short-term) and (long-term) and paid out at the end of the performance cycle. Per IRS Code Sec. 83(h) there shall be a deduction allowed under section 162 for the taxable year of the employer in which the option is exercised and value of such option is included in the taxable income of the employee. In addition, any cash
190	SchM-137 - R&E Credit	11,661,495	11,661,495					settlement is deductible under section 162 in the year of payment per IRS Code Sec. 461. This item reflects the deferred tax asset resulting from the excess or unused Increased Research Expenditures ("R&E") Credit. This item will be reversed at such time that the consolidated income tax liability becomes great enough to begin using carryforward credits.
190	SchM-146 - State Tax Deduction Cash Vs Accrual - 190	196,296			196,296			This item reflects ADIT on the temporary timing difference between state income taxes accrued and state income taxes paid.
190	SchM-152 - Rate Refund	477,053	477,053					Book revenue is adjusted currently for estimated amounts that will be refunded to customers in the future. For tax purposes, only refunds actually made to customers are deductions. This tax adjustment reverses the book income adjustments.
190	SchM-174 - New Hire Retention Credit	-				-		This item adds back to income the amount of the credit claimed for federal tax purposes.
	SchM-178 - Interest Income on Disputed Tax	448,180	448,180					This item reflects ADIT on the net temporary timing difference between net interest income on proposed audit adjustments that have been charged to book income and deducted for tax purposes, but cash has not yet been received.
190	SchM-179 - DSM/CIP	37,389	37,389					This item reflects ADIT on the net temporary timing difference between DSM expenditures being deducted for tax purposes and those DSM expenditures being expensed/amortized for book
190	SchM-180 - ITC Grant	-	-					This item reflects ADIT on the investment tax credits taken which are deferred until a subsequent period because of company allocated NOL's.
190	SchM-186 - Deferred Fuel Costs	-	-					This item reflects the ADIT resulting from the net temporary timing difference between inclusion of cost for electric generation and eventual recovery of costs from customers.
	SchM-187 - Reg Asset/Liability Transmission Attachment 0	1,052,795	1,052,795					This item reflects ADIT on the net temporary timing difference between the calculation of rates and recovery of rates for the FERC Transmission formula rates.
190	SchM-188 - Contributions Carryover	-	-					For book purposes, charitable contributions are deducted currently from book income. For tax purposes, contributions are deductible subject to certain limitations. This item adds back to taxable income, contributions deemed to be in excess of such limitations. This timing difference will reverse at such time when taxable income is sufficient enough.
190	SchM-189 - OCI Treasury	114,798	114,798					For book purposes, items reported in Other Comprehensive Income (OCI) on the balance sheet must be reported net of tax. One such item included in OCI for SPS relates to derivative instruments used to mitigate market risk and to enhance operations not qualifying for the normal purchases and normal sales exception, as defined by FAS No. 133 (Accounting for Derivative Instruments and Hedging Activities), which are recorded at fair value. This ADFIT amount reflects the taxes on OCI related to these types of derivative instruments.
190	SchM-192 - Texas Margin Tax	-	-					Texas Gross Margin Tax – For book purposes, per Statement of Financial Accounting Standards (FAS) No. 109 (Accounting for Income Taxes), regulated enterprises are required to adjust a deferred tax liability or asset for enacted changes in tax rates (i.e., ADIT balances must be calculated using the most recent income tax rates in effect as of the balance sheet date). Since under GAAP, the Texas Gross Margin Tax is considered an income tax, this ADIT balances reflects the difference between deferred taxes calculated on selected non-plant timing differences at a composite rate incorporating the Texas Gross Margin tax (apportionment and rate) and deferred taxes calculated on selected non-plant timing differences at a composite rate excluding the Texas Gross Margin tax (apportionment and rate).
	SchM-195 - Renewable Energy Standard	684,067	684,067					For book purposes the value (real or imputed) of renewable energy certificates (REC) acquired from various windpower producers are recorded as an offset to deferred costs which are set for recovery from customers, this offset to deferred cost expense is then held in inventory until such time as it is also recovered from customers. These REC's may also be sold to other companies which need them to meet state mandates for renewable energy.
190	SchM-201 - State Tax Deduction Cash vs Accrual - Fin 48	-	-					FIN 48 Adjustment (Federal, State, & Credits) recognize the ongoing recognition of changes in measurement of uncertain tax positions as reflected as a component of income tax expense and are outside the test year.
	SchM-203 - Fed NOL Benefit SchM-205 - State Only NOL	- 138,684	138,684					This item reflects the deferred tax asset resulting from SPS's allocated portion of the
190	SchM-213 - Rate Refund Reserve	-	-					following states NOLs for Oklahoma, New Mexico, and Oklahoma. Book revenue is adjusted currently for estimated amounts that will be refunded to customers in the future. For tax purposes, only refunds actually made to customers are deductions.
190	SchM-226 - Performance Recognition Award	18,081				18,081		This tax adjustment reverses the book income adjustments. The recipient of a Performance Recognition Award has up to two years to use the award. For book purposes, a liability is recorded on the books and reversed when the award is used. For tax purposes, per Reg. Sec. 1.461-1(a)(2)(i), the award is deductible when economic
190	SchM-261 - Section 59e Adjustment	10,257,519			10,257,519			performance has occurred; therefore, a book/tax difference exists Per IRS Code Sec. 461 the expenses for any amounts paid to retail customers for the
190	SchM-262 - Federal Only NOL - Non Operating	-	-					Distributive Generation Program are deducted in the current tax year for taxable income. This item reflects the deferred tax asset resulting from SPS's allocated portion of the federal
190	SchM-263 - Federal Only NOL - Production	-	-					NOL's classified as non-operating. This item reflects the deferred tax asset resulting from SPS's allocated portion of the federal NOL's classified as production.
190	SchM-264 - Federal Only NOL - Transmission	-		-				NOL's classified as production. This item reflects the deferred tax asset resulting from SPS's allocated portion of the federal NOL's classified as transmission.

100	SchM-265 - Federal Only NOL - General							This item reflects the deferred tax asset resulting from SPS's allocated portion of the federal
190	Schw-265 - Federal Only NOL - General	-				-		NOL's classified as general.
100	SchM-266 - Federal Only NOL - Distribution							This item reflects the deferred tax asset resulting from SPS's allocated portion of the federal
150	GGIIVI-200 - Federal Offiy NOL - Distribution	-	-					NOL's classified as distribution.
190	SchM-273 - Regulatory Liability - Rate Change	_	_					This item reflects ADIT on the temporary timing difference of the refund agreed to be paid to
150	Out of the state o	_						customers for the sale of Lubbock assets.
190	SchM-274 - Regulatory Differences - Excess Deferred Tax	-	-					Excess Deferred Taxes (Federal and State) – This reconciling item is the difference between
	Doran Er i Hogalatory Birleronous Excess Bereirou 147							plant related deferred tax expense booked and "proforma" plant related deferred tax expense
								calculated at the most recent composite federal and state income tax rate. Excess deferred
								taxes are the direct result of plant related deferred tax expense being calculated using the
								Average Rate Assumption Method ("ARAM") in lieu of using the most recent composite
								federal and state income tax rate. Excess deferred taxes at Southwestern Public Service
								Company ("SPS") at the present time are driven by changes in the state composite income
								tax rate; which takes into account both state apportionment information and statutory state
								income tax rates. The SPS composite federal and state income tax rate is revised annually
								after all state income tax returns have been filed.
190	SchM-299 - Operating Lease	86,438,393	86,438,393					SPS adopted the leasing guidance under ASC 842 on January 1, 2019 which states that
								PPAs should be included in lease payments for classification and measurement purposes.
								As a result of the guidance, SPS recognized an operating lease liability for book purposes.
								This change in accounting treatment results in a book/tax timing difference.
								Correspondingly, SPS records a deferred tax asset to FERC 190 related to the operating
								lease liability.
190	SchM-PTC - Deferred PTCs - Hale	258,544,920	258,544,920					The federal renewable electricity production tax credit (PTC) is an inflation-adjusted per-
								kilowatt-hour (kWh) tax credit for electricity generated by qualified energy resources and sold
								by the taxpayer to an unrelated person during the taxable year. The credit is available for 10-
								years after the facility is placed in service. If the Company is unable to use its current year
100	SchM-PTC - Deferred PTCs - Sagamore	187,833,784	187.833.784					PTCs against its current year tax liability, PTCs may be carried forward for 20 years. The federal renewable electricity production tax credit (PTC) is an inflation-adjusted per-
190	Scriw-PTC - Deferred PTCs - Sagarnore	101,033,104	101,033,104					kilowatt-hour (kWh) tax credit for electricity generated by qualified energy resources and sold
								by the taxpayer to an unrelated person during the taxable year. The credit is available for 10-
								years after the facility is placed in service. If the Company is unable to use its current year
								PTCs against its current year tax liability, PTCs may be carried forward for 20 years.
190								1 Too against no our one your tax nabinty; 1 Too may be carried for nara for 20 yours.

202	SchM-107 - Pension Expense							This item reflects ADIT on the net temporary timing difference between pension expense
203	Scriivi-107 - Perision Experise	-	•					accrued and the actual cash funding of the trust. Since SPS did not include the prepaid
								pension asset in rate base, it has excluded ADIT on pension expense.
283	SchM-128 - Book Unamort. Cost Of Reacquired Debt	-			_			This item reflects ADIT on the net temporary timing difference between the costs of
								reacquiring debt deducted for tax purposes and the cost of reacquiring debt deducted for
								book purposes.
283	SchM-138 - Rate Case Expense	-	-					This item reflects ADIT on the net temporary timing difference between rate
								case/restructuring costs deducted for tax purposes and rate case/restructuring costs
								deducted for book purposes.
283	SchM-147 - State Tax Deduction Cash Vs Accrual - 283	-			-			This item reflects ADIT on the temporary timing difference between state income taxes
								accrued and state income taxes paid.
283	SchM-168 - Reg Asset-NOx	-	-					For book purposes the deferral of the allowances expensed concurrent with the monthly
								emission of nitric oxide / nitrogen dioxide (NOx) in New Mexico as allowed in the 2011 New
								Mexico Rate Case. For tax purposes expense of the allowances are recognized as incurred.
283	SchM-178 - Interest Income on Disputed Tax	-	-					This item reflects ADIT on the net temporary timing difference between net interest income
								on proposed audit adjustments that have been charged to book income and deducted for tax
								purposes, but cash has not yet been received.
283	SchM-186 - Deferred Fuel Costs	-	-					This item reflects ADIT on the net temporary timing difference between the calculation of
								rates and recovery of rates for the FERC Transmission formula rates.
283	SchM-187 - Reg Asset/Liability Transmission Attachment (-	-					For book purposes, items reported in Other Comprehensive Income (OCI) on the balance
								sheet must be reported net of tax. One such item included in OCI for SPS relates to
								derivative instruments used to mitigate market risk and to enhance operations not qualifying
								for the normal purchases and normal sales exception, as defined by FAS No. 133
								(Accounting for Derivative Instruments and Hedging Activities), which are recorded at fair
								value. This ADFIT amount reflects the taxes on OCI related to these types of derivative
	0 111 100 001 T							instruments.
283	SchM-189 - OCI Treasury	-	-					For book purposes the value (real or imputed) of renewable energy certificates (REC)
								acquired from various windpower producers are recorded as an offset to deferred costs which are set for recovery from customers, this offset to deferred cost expense is then held
								in inventory until such time as it is also recovered from customers. These REC's may also
								be sold to other companies which need them to meet state mandates for renewable energy.
202	SchM-192 - Texas Margin Tax							This item reflects ADIT on the temporary timing difference between state income taxes
203	OCHW-192 - Texas Wargill Tax	-	-					accrued and state income taxes paid.
							ı	accided and state mostlic taxes paid.

200 00	chM-195 - Renewable Energy Standard							
								For book purposes, in complying with FASB Statement 133, "Accounting for Derivative Instruments and Hedging Activities", SPS has elected to treat most activity as balance sheet
								only (the "Settlement Basis") with entries being made between various asset and liability
								accounts and concurrent entries to other comprehensive income. However, with regards to
								wholesale regulated energy trading activities, SPS has elected "Mark to Market" accounting
								which requires periodic recognition of income or expense on the income statement with
								concurrent entries to asset accounts. For tax purposes, the Company has not elected to
								follow IRS Code Sec. 475, "Mark to market accounting method for dealers in securities".
								This reconciling item reverses the book amounts for "Mark to Market" income or expense for
								the current period.
283 Sc	chM-201 - State Tax Deduction Cash vs Accrual - Fin 48	-	-					In September 2014, SPS received final orders allowing a rate increase effective retroactively
								to June 2014. For book purposes, income was accrued in 2014 and will be amortized off as
								collected from customer bills. For tax purposes, under Reg. § 1.451-1(a), income is
								recognized when SPS collected this rate increase in customer bills.
283 Sc	chM-207 - Mark to Market Adjust	-	-					The Tax Cuts and Jobs Act was passed on 12/22/2017. The law lowered the federal tax rate
								from 35% to 21%. Accordingly, SPS's deferred tax assets and deferred tax liabilities were
								restated to the new 21% rate. A portion of the total rate change will be collected through
								rates and is therefore on SPS's books as a regulatory asset, including a gross-up.
283 Sc	chM-275 - Reg Asset - Miscellaneous	-	-					This item is the temporary timing difference associated with Federal NOL differences in rates
								between the unrecognized tax benefits (35%) vs accumulated deferred income taxes (21%)
								and will reverse when the underlying FIN 48 differences are reversed.
283 Sc	chM-299 - Operating Lease	-	-					SPS has certain regulatory recovery mechanisms that are tax sensitive. For book purposes,
								income is accrued to a regulatory asset and then amortized off as collected from customer
								bills. For tax purposes, under C.F.R. § 1.451-1(a), income is recognized when SPS collects
								this rate increase in customer bills.
283 Sc	chM-300 - Reg A/L - Emergency Spec Response	-	-					SPS adopted the leasing guidance under ASC 842 on January 1, 2019 which states that
								PPAs should be included in lease payments for classification and measurement purposes.
								As a result of the guidance, SPS recognized a right-of-use asset for book purposes. This
								change in accounting treatment results in a book/tax timing difference. Correspondingly,
								SPS records a deferred tax liability to FERC 283 related to the right-of-use asset.

	Basis Difference - CIAC Transmission							pension and benefits capitalized, and ESOP dividends capitalized. This item reflects ADIT on tax only originating timing difference for taxable Contributions In
				-				Aid of Construction (CIAC).
190	Basis Difference - CIAC Production	-	-					This item reflects ADIT on tax only originating timing difference for taxable Contributions In Aid of Construction (CIAC).
190	Basis Difference - CIAC General	-				-		This item reflects ADIT on tax only originating timing difference for taxable Contributions In Aid of Construction (CIAC).
190	Basis Difference - CIAC Elec Non Utility	-	-					This item reflects ADIT on tax only originating timing difference for taxable Contributions In
190	SchM-102 - Fuel Tax Credit - Inc Addback	-			-			Aid of Construction (CIAC). This item adds back to income the amount of the credit claimed for federal tax paid on fuels
190	SchM-103 - Environmental Remediation		-					used in off-road equipment. For book purposes the costs incurred in the clean-up of various company and non-company
130	Gorina 100 - Environmental Remodiation							sites from hazardous substances are accumulated and amortized over a period authorized
								by the PUC, generally 36 months. Per IRS Code Section 198, a taxpayer may elect to treat any qualified environmental remediation expenditure which is paid or incurred by the
								taxpayer as an expense which is not chargeable to a capital account. Any expenditure which is so treated shall be allowed as a deduction for the taxable year in which it is paid or
100	SchM-108 - Accrued Vacation Paid							incurred. For book purposes, the vacation liability is charged to book expense as employees earn
190	Scriivi-106 - Accided Vacation Faid	•				-		vacation time. For tax purposes, a deduction can be claimed only when the vacation is
								actually taken unless it is taken within 2.5 months of the end of the accrual year. This item reverses the book vacation accrual for the current year, and takes as a deduction the amount
100	SchM-109 - Employee Incentive							of vacation pay actually used during the year plus the following 2.5 months. This item reflects the ADIT resulting from the net temporary difference on the incentives paid
	, ,					_		to employees accrued in one year and paid is the subsequent year.
190	SchM-111 - Post Employment Benefits - FAS 106(Short T	-				-		This item reflects the net of the OPEB expenses and contributions (added back to taxable income) and OPEB funding and distributions (which are deducted).
190	SchM-112 - Post Employment Benefits FAS 112	-				-		This pertains to long-term disability (LTD) benefits. Expenses accrued for book purposes are credited to a liability account and associated payments are debited to this account. For tax
								purposes, a deduction is allowed for payments charged to this liability account. This item
								reflects the current year changes to the LTD liability account (increase in the account balance are added to taxable income and decreases in the account balance are deducted
190	SchM-116 - Bad Debt		-					from taxable income). Book expense includes the amount of expected uncollectible accounts receivable. For tax
								purposes, only those uncollectible accounts receivable actually written off are deductible. This item reflects the net of the bad debt provision (added back to taxable income) and
								uncollectible accounts receivable actually written off (which are deducted from taxable
190	SchM-118 - Inventory Reserve	-			-			income.) This item is the difference between the book accrual (which is an addition to taxable income)
190	SchM-119 - Electric Vehicle Credit	_			-			and write offs (deductions from taxable income). This item reflects the deferred tax asset resulting from the excess or unused Electric Vehicle
								Credit. This item will be reversed at such time that the consolidated income tax liability
190	SchM-127 - Litigation Reserve	-				-		becomes great enough to begin using carryforward credits. This item reflects the ADIT resulting from the net temporary timing differences between book
190	SchM-130 - Deferred Compensation Plan Reserve					-		recognition of possible outcomes from litigation and the actual payments made. For book purposes, costs are accrued for a retirement plan for officers and certain key
								employees and currently charged against book income. Payments made to these retirees from the SERP Trust are not charged against book income but rather they are charged
								against the Trust account. IRC Section 404(a) allows a deduction to the employer for
								amounts paid to employees (retirees) in the year that the payment is includable in the employees (retirees) gross income. This amount is the net of the accrual (added back to
190	SchM-134 - Non-Qualified Pension Plans - 190					_		taxable income) and payments (which are deducted from taxable income). For book purposes an accrual is made to expense the supplemental compension for
.50	J. J							executives as instructed by FAS 158 - Employers' Accounting for Defined Benefit Plans and Other Postretirement Plans using short-term and long-term OCI; and for the utilities the
								amounts that are recoverable through the rate process and not currently in income are
								recorded as regulatory assets and regulatory liabilities. Periodic funds to the plans are made with a debit to these accounts and credits to cash. Per IRS Code Sec. 404(a) a deduction is
100	SchM-136 - Performance Share Plan							allowed to the employer when payments are made. For book purposes, the Performance Share Plan (performance awards are granted at the
190	Schwi-130 - Performance Share Plan	-				-		beginning of a three-year cycle) expense is recorded currently over the plan period with a
								concurrent entry to liability accounts (short-term) and (long-term) and paid out at the end of the performance cycle. Per IRS Code Sec. 83(h) there shall be a deduction allowed under
								section 162 for the taxable year of the employer in which the option is exercised and value of such option is included in the taxable income of the employee. In addition, any cash
								settlement is deductible under section 162 in the year of payment per IRS Code Sec. 461.
190	SchM-137 - R&E Credit	-	-					This item reflects the deferred tax asset resulting from the excess or unused Increased Research Expenditures ("R&E") Credit. This item will be reversed at such time that the
								consolidated income tax liability becomes great enough to begin using carryforward credits.

190	SchM-146 - State Tax Deduction Cash Vs Accrual - 190	-			-		This item reflects ADIT on the temporary timing difference between state income taxes accrued and state income taxes paid.
	SchM-152 - Rate Refund	-					
	SchM-174 - New Hire Retention Credit	-				_	This item adds back to income the amount of the credit claimed for federal tax purposes.
	SchM-178 - Interest Income on Disputed Tax	-					This item reflects ADIT on the net temporary timing difference between net interest income on proposed audit adjustments that have been charged to book income and deducted for tax purposes, but cash has not yet been received.
190	SchM-179 - DSM/CIP	-	-				This item reflects ADIT on the net temporary timing difference between DSM expenditures being deducted for tax purposes and those DSM expenditures being expensed/amortized for book.
190	SchM-180 - ITC Grant	-	-				This item reflects ADIT on the investment tax credits taken which are deferred until a subsequent period because of company allocated NOL's.
190	SchM-186 - Deferred Fuel Costs	-	-				This item reflects the ADIT resulting from the net temporary timing difference between inclusion of cost for electric generation and eventual recovery of costs from customers.
190	SchM-187 - Reg Asset/Liability Transmission Attachment	-	-				This item reflects ADIT on the net temporary timing difference between the calculation of rates and recovery of rates for the FERC Transmission formula rates.
190	SchM-188 - Contributions Carryover	-	-				For book purposes, charitable contributions are deducted currently from book income. For tax purposes, contributions are deductible subject to certain limitations. This item adds back to taxable income, contributions deemed to be in excess of such limitations. This timing difference will reverse at such time when taxable income is sufficient enough.
190	SchM-189 - OCI Treasury	-					For book purposes, items reported in Other Comprehensive Income (OCI) on the balance sheet must be reported net of tax. One such item included in OCI for SPS relates to derivative instruments used to mitigate market risk and to enhance operations not qualifying for the normal purchases and normal sales exception, as defined by FAS No. 133 (Accounting for Derivative Instruments and Hedging Activities), which are recorded at fair value. This ADFIT amount reflects the taxes on OCI related to these types of derivative instruments.
190	SchM-192 - Texas Margin Tax	-					Texas Gross Margin Tax – For book purposes, per Statement of Financial Accounting Standards (FAS) No. 109 (Accounting for Income Taxes), regulated enterprises are required to adjust a deferred tax liability or asset for enacted changes in tax rates (i.e., ADIT balances must be calculated using the most recent income tax rates in effect as of the balance sheet date). Since under GAAP, the Texas Gross Margin Tax is considered an income tax, this ADIT balances reflects the difference between deferred taxes calculated on selected non-plant timing differences at a composite rate incorporating the Texas Gross Margin tax (apportionment and rate) and deferred taxes calculated on selected non-plant timing differences at a composite rate excluding the Texas Gross Margin tax (apportionment and rate).
190	SchM-195 - Renewable Energy Standard	-					For book purposes the value (real or imputed) of renewable energy certificates (REC) acquired from various windpower producers are recorded as an offset to deferred costs which are set for recovery from customers, this offset to deferred cost expense is then held in inventory until such time as it is also recovered from customers. These REC's may also be sold to other companies which need them to meet state mandates for renewable energy.
190	SchM-201 - State Tax Deduction Cash vs Accrual - Fin 48	-	-				FIN 48 Adjustment (Federal, State, & Credits) recognize the ongoing recognition of changes in measurement of uncertain tax positions as reflected as a component of income tax expense and are outside the test year.
	SchM-203 - Fed NOL Benefit	-					
190	SchM-205 - State Only NOL	-					This item reflects the deferred tax asset resulting from SPS's allocated portion of the following states NOLs for Oklahoma, New Mexico, and Oklahoma.
190	SchM-207 - Mark to Market Adjust	-	·				For book purposes, in complying with FASB Statement 133, "Accounting for Derivative Instruments and Hedging Activities", SPS has elected to treat most activity as balance sheet only (the "Settlement Basis") with entries being made between various asset and liability accounts and concurrent entries to other comprehensive income. However, with regards to wholesale regulated energy trading activities, SPS has elected "Mark to Market" accounting which requires periodic recognition of income or expense on the income statement with concurrent entries to asset accounts. For tax purposes, the Company has not elected to follow IRS Code Sec. 475, "Mark to market accounting method for dealers in securities". This reconciling item reverses the book amounts for "Mark to Market" income or expense for the current period.
190	SchM-213 - Rate Refund Reserve	-	-				Book revenue is adjusted currently for estimated amounts that will be refunded to customers in the future. For tax purposes, only refunds actually made to customers are deductions. This tax adjustment reverses the book income adjustments.
190	SchM-223 - Unamortized ITC	-	-				This item reflects ADIT on unamortized ITC based on revenue requirement impact (i.e., "grossed-up" for taxes). This timing difference will be reversed over the remaining life of the underlying utility property to which the investment tax credits relate. The ITC will be fully amortized in 2021.
	SchM-226 - Performance Recognition Award	-				-	The recipient of a Performance Recognition Award has up to two years to use the award. For book purposes, a liability is recorded on the books and reversed when the award is used. For tax purposes, per Reg. Sec. 1.461-1(a)(2)(i), the award is deductible when economic performance has occurred; therefore, a book/tax difference exists
	SchM-261 - Section 59e Adjustment	-	-				 Per IRS Code Sec. 461 the expenses for any amounts paid to retail customers for the Distributive Generation Program are deducted in the current tax year for taxable income.
	SchM-262 - Federal Only NOL - Non Operating	-		-			 This item reflects the deferred tax asset resulting from SPS's allocated portion of the federal NOL's classified as non-operating.
	SchM-263 - Federal Only NOL - Production	-				-	 This item reflects the deferred tax asset resulting from SPS's allocated portion of the federal NOL's classified as production.
	SchM-264 - Federal Only NOL - Transmission	-	-				This item reflects the deferred tax asset resulting from SPS's allocated portion of the federal NOL's classified as transmission.
	SchM-265 - Federal Only NOL - General	-	-				This item reflects the deferred tax asset resulting from SPS's allocated portion of the federal NOL's classified as general.
	SchM-266 - Federal Only NOL - Distribution	-	-				This item reflects the deferred tax asset resulting from SPS's allocated portion of the federal NOL's classified as distribution.
190	SchM-273 - Regulatory Liability - Rate Change	-					This item reflects ADIT on the temporary timing difference of the refund agreed to be paid to customers for the sale of Lubbock assets.

190	SchM-274 - Regulatory Differences - Excess Deferred Tax	-	-					Excess Deferred Taxes (Federal and State) - This reconciling item is the difference between
								plant related deferred tax expense booked and "proforma" plant related deferred tax expense
								calculated at the most recent composite federal and state income tax rate. Excess deferred
								taxes are the direct result of plant related deferred tax expense being calculated using the
								Average Rate Assumption Method ("ARAM") in lieu of using the most recent composite
								federal and state income tax rate. Excess deferred taxes at Southwestern Public Service
								Company ("SPS") at the present time are driven by changes in the state composite income
								tax rate; which takes into account both state apportionment information and statutory state
								income tax rates. The SPS composite federal and state income tax rate is revised annually
								after all state income tax returns have been filed.
190	SchM-299 - Operating Lease	-	-					SPS adopted the leasing guidance under ASC 842 on January 1, 2019 which states that
								PPAs should be included in lease payments for classification and measurement purposes.
								As a result of the guidance, SPS recognized an operating lease liability for book purposes.
								This change in accounting treatment results in a book/tax timing difference.
								Correspondingly, SPS records a deferred tax asset to FERC 190 related to the operating
								lease liability.
100	SchM-PTC - Deferred PTCs - Hale							The federal renewable electricity production tax credit (PTC) is an inflation-adjusted per-
190	Continue To - Deferred F 103 - Flate	-						kilowatt-hour (kWh) tax credit for electricity generated by qualified energy resources and sold
								by the taxpayer to an unrelated person during the taxable year. The credit is available for 10-
								years after the facility is placed in service. If the Company is unable to use its current year
								PTCs against its current year tax liability, PTCs may be carried forward for 20 years.
	SchM-PTC - Deferred PTCs - Sagamore	-	-

Notes:

The Formula Rate shall include a credit to rate base for each unfunded reserve. An unfunded reserve is a reserve where an escrow, trust, or restricted account has not been established for a fund whose balance is collected from customers through cost accruals to accounts that are recovered under the Formula Rate. Each unfunded reserve will be included on the lines above. The allocator in Col. (9) will be the same allocator used in the Formula Rate for the cost accruals to the account that is recovered under the Formula Rate

for including specific incentive CWIP projects in the formula rate. SPS accounting records will be the

⁶⁵ source of this data.

Southwestern Public Service Company Worksheet R - Incentive Projects.

I. Calculate Return and Income Taxes with hypothetical 100 basis point ROE increase.

Line A. Determine "R" with hypothetical 100 basis point increase in ROE.

INO.						
1	ROE w/o incentives (From	Page 5, In 178)		10.50%		
2	ROE with additional 100 ba	sis point incentive		11.50%		
3	Determine R (cost of long term debt, cost of preferred stock and percent is from Page 5, Ins 176 throug					
4		<u>%</u>	Cost	Weighted cost		
5	Long Term Debt	45.65%	0.0444	0.0203		
6	Preferred Stock	0.00%	0.0000	0.0000		
7	Common Stock	54.35%	0.1150	0.0625		
8			R =	0.0828		

B. Determine Return using "R" with hypothetical 100 basis point ROE increase.

9	Rate Base (From Page 3, In 89)	2,865,215,452
10	R (from A. above)	0.0828
11	Return (Rate Base x R)	237,239,839

C. Determine Income Taxes using Return with hypothetical 100 basis point ROE increase.

12	Return (from B. above)	237,239,839
13	CIT (From Page 4, In 131)	21.76%
14	Income Tax Calculation (Return x CIT)	51,623,389
15	ITC Adjustment (From Page 4, In 137)	-
16	Income Taxes	51,623,389

II. Calculate Net Plant Carrying Charge Rate (Fixed Charge Rate or FCR) with hypothetical 100 basis point ROE increase.

Line A. Determine Net Revenue Requirement less return and Income Taxes.

No.		
17	Net Revenue Requirement (From Page 2, In 33)	420,110,478
18	Return (From Page 4, In 139)	221,767,676
19	Income Taxes (From Page 4, In 138)	45,545,148
20	Net Revenue Requirement, Less Return and Taxes	152,797,653

B. Determine Net Revenue Requirement with hypothetical 100 basis point increase in ROE.

21	Net Revenue Requirement, Less Return and Taxes	152,797,653
22	Return (from I.B. above)	237,239,839
23	Income Taxes (from I.C. above)	51,623,389
24	Net Revenue Requirement, with 100 Basis Point ROE increase	441,660,881
25	Depreciation (From Page 4, In 114)	99,323,107
26	Net Rev. Req, w/100 Basis Point ROE increase, less Depreciation	342,337,774

C. Determine FCR with hypothetical 100 basis point ROE increase.

27 28 29	Net Transmission Plant (From Page 3, In 62) Net Revenue Requirement, with 100 Basis Point ROE increase FCR with 100 Basis Point increase in ROE	3,411,275,229 441,660,881 12.95%	
30 31	Net Rev. Req, w/100 Basis Point ROE increase, less Dep. FCR with 100 Basis Point ROE increase, less Depreciation	342,337,774 10.04%	(use when no CIAC is associated with facilities receiving incentives)
32	FCR w/o 100 Basis Point ROE increase, less Depreciation	9.40%	(From Page 2, In 40)
33	ECR w/o Return Income Taxes and Depreciation	0.64%	(use when CIAC is associated with facilities receiving incentives)

Line

III. Determine the Additional Revenue Requirement and Revenue Credit for facilities receiving incentives.

A. Facilities receiving incentives accepted by FERC in Docket No.

The calculated Additional Revenue Requirement and Revenue Credit shown below are only valid for Investment Years matching Current Year. Values prior and subsequent to the Current Year will change as Attachment O is updated. These changes will not result in a refund or additional charge related to years prior to the Current Year.

Beginning Balance = Investment in first year and prior year Ending Balance, thereafter
Depreciation Expense = Straight line depreciation equal to Investment divided by Useful Life
Ending Balance = Beginning Balance - Depreciation Expense
Revenue Requirement = FCR * Beginning Balance plus Depreciation Expense, adjusted by Service Month divided by 12 in the first year
Additional Rev. Requirement = Revenue Requirement wincentives less w/o incentive for the year
Additional Revenue Credit = Revenue Requirement w/o incentives

No.				De	tails		1

Line

III. Determine the Additional Revenue Requirement and Revenue Credit for facilities receiving incentives. (cont.)

B. Facilities receiving incentives accepted by FERC in Docket No.

The calculated Additional Revenue Requirement and Revenue Credit shown below are only valid for Investment Years matching Current Year. Values prior and subsequent to the Current Year will change as Attachment O is updated. These changes will not result in a refund or additional charge related to years prior to the Current Year.

Beginning Balance = Investment in first year and prior year Ending Balance, thereafter
Depreciation Expense = Straight line depreciation equal to Investment divided by Useful Life
Ending Balance = Beginning Balance - Depreciation Expense
Revenue Requirement = FCR * Beginning Balance plus Depreciation Expense, adjusted by Service Month divided by 12 in the first year
Additional Rev. Requirement = Revenue Requirement wincentives less w/o incentive for the year
Additional Revenue Credit = Revenue Requirement w/o incentives
