

NEW AVERY SUBSTATION TO DELIVER RELIABLE, SAFE POWER

Xcel Energy is investing in the electric system serving this fast-growing area of northern Colorado, including Windsor, Timnath, Severance and the surrounding communities. The new Avery Substation will help reduce the risk of outages while meeting the energy needs of existing and new homes and businesses for years to come.

Substation construction began in early 2021 and we anticipate completing the work by Summer 2022. Xcel Energy is committed to communicating with you on a regular basis about outages and Avery Substation construction updates.

September 2021 Construction Update

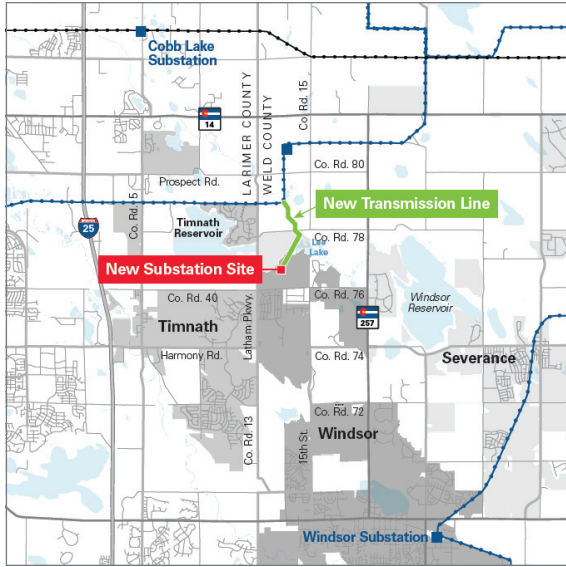

Recently completed activities:

- Major site grading and the substation access drive.

Upcoming activities:

- Excavating and pouring concrete for substation equipment foundations. Installing underground vaults and wire conduit for electrical distribution equipment along Latham Parkway. Installing underground equipment along the north side of Weld County Road 76, east of Latham Parkway, will begin once crops are harvested.
- Equipment delivery and placement will continue throughout September.
- Transmission line construction north from the substation site should begin in mid-October.

Construction schedules may change. Check for updates by visiting [xcelenergy.com/Avery](https://www.xcelenergy.com/Avery) or contacting us at info@xcelenergyaverysubstation.com or **833-539-0506**. You can also sign up to receive future project updates by emailing info@xcelenergyaverysubstation.com.

ABOUT THE PROJECT

Xcel Energy is building the Avery Substation and 1.3 miles of new transmission line within Windsor and Severance town limits and within unincorporated Weld County. It will interconnect with existing transmission lines, strengthen grid reliability and resiliency and deliver the reliable service you expect.
