#### SOUTHWESTERN PUBLIC SERVICE COMPANY

#### General Notes: a) References to data from FERC Form 1 are indicated as: page#.line#.col.#

Note Letter		
A	The revenues credited shall include amounts received directly from the SPP for service under this Revenues associated with FERC annual charges, gross receipts taxes, ancillary services or other definition of transmission facilities under this tariff shall not be included as revenue credits. Reven	facilities revenues shall be excluded from the
	in the DIVISOR are also not included as revenue credits unless this revenue is offset by a corresp	
В	The annual and monthly net and gross plant carrying charges on page 2 are to be used to compute any Base Plan Upgrades, distribution facilities, and radial lines.	• .
С	This additional revenue requirement is determined using a net plant carrying charge (fixed carrying of the additional revenue requirements for each project receiving incentive rate treatment, as accadditional revenue requirements shall be summed, for the then current year, and included here.	
D	Reflects the transmission related portion of balances in Accounts 281, 282, 283, 190, and 255 as a regulatory assets or liabilities related to FASB 106, 109, 133,158 or FASB Interpretation No. 48. completely excluded if the utility chose to utilize amortization of tax credits against taxable incom The calculation of ADIT for both the true-up and the annual projection will be performed in according The Annual True-Up for a given year will use the same methodology that was used to project the described on Table 21A of the template.)	Balance of Account 255 is reduced by prior flow throughs and ne as discussed in Note M. dance with IRS regulation Section 1.167(I)-1(h)(6).
E	Includes any incentive Construction Work in Progress (CWIP), any related Allowance for Funds Us related to the recovery of abandoned incentive plant costs, any extraordinary property losses and Formula amounts for all of the foregoing items will remain at \$0 until approved by FERC under a s	any related depreciation and amortization expense amounts.
F	Includes only transmission related or functionally booked as transmission land held for future use.	
G	Cash Working Capital will be set at and remain \$0 until such time as SPS files and receives FERC	
Н	Equal to the balance of Network Facilities Upgrades Credits, net of accumulated depreciation, due towards the construction of Network Transmission Facilities consistent with Paragraph 657 of Orderevenue requirement on line 140.	
1	The base plan upgrade revenue requirement will be updated annually based on actual data for the provided to the SPP no later than October 20 for billings effective January 1.	e prior billing period. The updated revenue requirement will be
J	(Reserved for future use)	
К	Includes all Regulatory Commission expense itemized in FERC Form 1 at 351.h. Show in Worksh FERC Assessment Fees, General Advertising, and Industry Association Dues and Research and to transmission. A & G expenses shall Include specific transmission safety-related advertising ar The annual PBOP expense amount will be based on the PBOP expense amount reported in SPS the date of SPS's Annual Update. SPS will provide a copy of that actuarial report as part of its AI NERC fees recorded in Acct. 928, Regulatory Commission Expenses, or in Acct. 165, Prepayme	Developments costs recorded in 930.2 shall not be assigned and transmission siting advertising costs. Some most recent annual actuarial valuation report as of annual Update and its Annual Informational Filing to the Commission.
L	Includes only FICA, unemployment, highway, property and other assessments charged in the curre retail and non-transmission related taxes are excluded.	rent year. Gross receipts tax, taxes related to income,
M	The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State	income tax rate, and p =
	"the percentage of federal income tax deductible for state income taxes". If the utility is taxed in r	more than one state, it must attach a
	work paper showing the name of each state and how the blended or composite SIT was developed	the contract of the contract o
	elected to utilize amortization of tax credits against taxable income, rather than book tax credits to	
	rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax C (In 135) multiplied by (1/1-T). If the applicable tax rates are zero enter 0.	Gredit (Form 1, 266.8.f)
	Inputs Required: FIT =	21.00%
	SIT= (Worksheet L)	2.08% (State Income Tax Rate or Composite SIT)
	p = `	0.00% (percent of FIT deductible for state purposes)
N	Removes the dollars of plant booked to transmission plant that is excluded from the Tariff because Facilities, or is booked to transmission (e.g. step-up transformers) that is included in the developr or is otherwise not eligible to be recovered under this Tariff.	
0	Enter dollar amounts. Includes service company labor. Does not include contract labor.	
P	Includes the amortization of any excess/deficient deferred income taxes resulting from changes to other actions taken by a taxing authority. Excess and deficient deferred income taxes will reduce to by (1/(1-T)).	, , , , , , , , , , , , , , , , , , , ,

Rate Formula Template
Utilizing FERC Form 1 Actual Data
For the Billing Period 01/01/2022 to 12/31/2022

#### SOUTHWESTERN PUBLIC SERVICE COMPANY

#### General Notes: a) References to data from FERC Form 1 are indicated as: page#.line#.col.#

Note	
Letter	
Α	The revenues credited shall include amounts received directly from the SPP for service under this tariff reflecting SPS's integrated transmission facilities.
	Revenues associated with FERC annual charges, gross receipts taxes, ancillary services or other facilities revenues shall be excluded from the
	definition of transmission facilities under this tariff shall not be included as revenue credits. Revenue from coincident peak loads included
	in the DIVISOR are also not included as revenue credits unless this revenue is offset by a corresponding expense. See Worksheet B for details.
В	The annual and monthly net and gross plant carrying charges on page 7 are to be used to compute the revenue requirement for directly assigned facilities, any Base Plan Upgrades, distribution facilities, and radial lines.
С	This additional revenue requirement is determined using a net plant carrying charge (fixed carrying charge or FCR) approach. Worksheet R shows the calculation
Ü	of the additional revenue requirements for each project receiving incentive rate treatment, as accepted by FERC by a separate docket. These individual
Б	additional revenue requirements shall be summed, for the then current year, and included here.
D	Reflects the transmission related portion of balances in Accounts 281, 282, 283, 190, and 255 as adjusted by any amounts in contra accounts identified as
	regulatory assets or liabilities related to FASB 106, 109, 133,158 or FASB Interpretation No. 48. Balance of Account 255 is reduced by prior flow throughs and
	completely excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note M.
	The calculation of ADIT for both the true-up and the annual projection will be performed in accordance with IRS regulation Section 1.167(I)-1(h)(6).
	The Annual True-Up for a given year will use the same methodology that was used to project that year's rates. (Except for ADIT Proration which is
Е	described on Table 21A of the template.)
_	Includes any incentive Construction Work in Progress (CWIP), any related Allowance for Funds Used During Construction (AFUDC), any unamortized balances related to the recovery of abandoned incentive plant costs, any extraordinary property losses and any related depreciation and amortization expense amounts.
	Formula amounts for all of the foregoing items will remain at \$0 until approved by FERC under a separate docket.
F	Includes only transmission related or functionally booked as transmission land held for future use.
G	Cash Working Capital will be set at and remain \$0 until such time as SPS files and receives FERC approval for a lead/lag study.
Н	Equal to the balance of Network Facilities Upgrades Credits, net of accumulated depreciation, due transmission customers that made lump-sum payments
	towards the construction of Network Transmission Facilities consistent with Paragraph 657 of Order 2003-A. Excludes interest since interest is added to the
	revenue requirement on line 292.
1	The base plan upgrade revenue requirement will be updated annually based on actual data for the prior billing period. The updated revenue requirement will be
•	provided to the SPP no later than October 20 for billings effective January 1.
J	(Reserved for future use)
K	Includes all Regulatory Commission expense itemized in FERC Form 1 at 351.h. Show in Worksheet H how these expense items are assigned to transmission.
	FERC Assessment Fees, General Advertising, and Industry Association Dues and Research and Developments costs recorded in 930.2 shall not be assigned
	to transmission. A & G expenses shall Include specific transmission safety-related advertising and transmission siting advertising costs.
	The annual PBOP expense amount will be based on the PBOP expense amount reported in SPS's most recent annual actuarial valuation report as of
	the date of SPS's Annual Update. SPS will provide a copy of that actuarial report as part of its Annual Update and its Annual Informational Filing to the Commission
	NERC fees recorded in Acct. 928, Regulatory Commission Expenses, or in Acct. 165, Prepayments, shall be excluded from the formula.
L	Includes only FICA, unemployment, highway, property and other assessments charged in the current year. Gross receipts tax, taxes related to income,
	retail and non-transmission related taxes are excluded.
M	The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p =
	"the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state, it must attach a
	work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that
	elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce
	rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f)
	(In 287) multiplied by (1/1-T) . If the applicable tax rates are zero enter 0.
	Inputs Required: FIT = 21.00%
	SIT= (Worksheet L) 2.17% (State Income Tax Rate or Composite SIT)
	p = 0.00% (percent of FIT deductible for state purposes)
N	Removes the dollars of plant booked to transmission plant that is excluded from the Tariff because it does not meet the Tariff's definition of Transmission
	Facilities, or is booked to transmission (e.g. step-up transformers) that is included in the development of OATT ancillary service rates,
0	or is otherwise not eligible to be recovered under this Tariff.
O P	Enter dollar amounts. Includes service company labor. Does not include contract labor.
۲	Includes the amortization of any excess/deficient deferred income taxes resulting from changes to income tax laws, income tax rates

Data Source - Account 454 General Ledger Detail Analysis

84 Description of Revenue Types:

81 Ancillary

82 Other 83 Total

85 Ancillary Ancillary services includes regulation & frequency, control & dispatch, voltage
86 control, reactive, spinning reserve, scheduling and generation step-up.
87 Divisor Load associated with these revenues are included in the formula divisor.

88 Credit Revenue credit because load not included in divisor.

#### NOTES

- 1) Column J is the difference between projected monthly and actual monthly activity (Column I minus Column F). Specifically, if projected and actual activity are both positive, a
- 2) Column K preserves proration when actual monthly and projected monthly activity are either both increases or decreases. Specifically, if Column J is over-projected, enter
- 3) Column L applies when (1) Column J is under-projected AND (2) actual monthly and projected monthly activity are either both increases or decreases. Enter the amount from
- 4) Column M applies when (1) projected monthly activity is an increase while actual monthly activity is a decrease OR (2) projected monthly activity is a decrease while actual
- 5) Column N is computed by adding the prorated monthly activity, if any, from Column K to 50 percent of the portion of monthly activity, if any, from Column L or M to the balance
- 6) The methodolgy to remove double averaging from the true-up ADIT Proration calculation is effective June 27, 2018.
  7) Excess/deficient ADIT resulting from the enactment of the Tax Reform and Jobs Act is included beginning January 1, 2018 (with the 2018 True-Up)

283	Liberalized Depreciation - Software Electric Intangible	(19,421,974)				(19,421,974)		basis plant in service and tax basis plant in service of computer software only.  This item reflects ADIT on method/life depreciation differences between book	
283	SchM-107 - Pension Expense	(34,382,459)	(34,382,459)					basis plant in service and tax basis plant in service of computer software only.  This item reflects ADIT on the net temporary timing difference between pension	
								expense accrued and the actual cash funding of the trust. Since SPS did not include the prepaid pension asset in rate base, it has excluded ADIT on pension	
202	SchM-128 - Book Unamort. Cost Of Reacquired Debt	(4,403,513)			(4,403,513)			expense.  This item reflects ADIT on the net temporary timing difference between the costs	
203	Scrim-120 - Book Grianion. Cost of Neacquired Debt	(4,403,313)			(4,400,510)			of reacquiring debt deducted for tax purposes and the cost of reacquiring debt deducted for book purposes.	
283	SchM-138 - Rate Case Expense	(8,366,941)	(8,366,941)					This item reflects ADIT on the net temporary timing difference between rate case/restructuring costs deducted for tax purposes and rate case/restructuring	
283	SchM-146 - State Tax Deduction Cash Vs Accrual - 190	-			-			costs deducted for book purposes.  This item reflects ADIT on the temporary timing difference between state income	
283	SchM-147 - State Tax Deduction Cash Vs Accrual - 283	(368,309)			(368,309)			taxes accrued and state income taxes paid.  This item reflects ADIT on the temporary timing difference between state income	
	SchM-179 - DSM/CIP	(000,000)			(000,000)			taxes accrued and state income taxes paid.	
283	SCHW-179 - DSWICIP		-					This item reflects ADIT on the net temporary timing difference between net interest income on proposed audit adjustments that have been charged to book income and deducted for tax purposes, but cash has not yet been received.	
283	SchM-186 - Deferred Fuel Costs	(3,072,743)	(3,072,743)					This item reflects the ADIT resulting from the net temporary timing difference between inclusion of cost for electric generation and eventual recovery of costs	
		(222-22)						from customers.	
283	SchM-187 - Reg Asset/Liability Transmission Attachment O	(305,072)	(305,072)					This item reflects ADIT on the net temporary timing difference between the calculation of rates and recovery of rates for the FERC Transmission formula rates.	
283	SchM-189 - OCI Treasury SchM-192 - Texas Margin Tax	(112,956)	(112,956)					Texas Gross Margin Tax – For book purposes, per Statement of Financial	
250		(112,000)	(11,000)					Accounting Standards (FAS) No. 109 (Accounting for Income Taxes), regulated enterprises are required to adjust a deferred tax liability or asset for enacted changes in tax rates (i.e., ADIT balances must be calculated using the most recent income tax rates in effect as of the balance sheet date). Since under GAAP, the Texas Gross Margin Tax is considered an income tax, this ADIT balances reflects the difference between deferred taxes calculated on selected non-plant timing differences at a composite rate incorporating the Texas Gross Margin tax (apportionment and rate) and deferred taxes calculated on selected non-plant timing differences at a composite rate excluding the Texas Gross Margin tax (apportionment and rate).	
283	SchM-195 - Renewable Energy Standard	(976,236)	(976,236)					For book purposes the value (real or imputed) of renewable energy certificates (REC) acquired from various windpower producers are recorded as an offset to deferred costs which are set for recovery from customers, this offset to deferred cost expense is then held in inventory until such time as it is also recovered from customers. These REC's may also be sold to other companies which need ther to meet state mandates for renewable energy.	
283	SchM-275 - Reg Asset - Miscellaneous	(7,798,300)	(7,798,300)					SPS has certain regulatory recovery mechanisms that are tax sensitive. For bot purposes, income is accrued to a regulatory asset and then amortized off as collected from customer bills. For tax purposes, under C.F.R. § 1.451-1(a), income is recognized when SPS collects this rate increase in customer bills.	
283	SchM-293 - Rate Change	-	-					In September 2014, SPS received final orders allowing a rate increase effective retroactively to June 2014. For book purposes, income was accrued in 2014 an will be amortized off as collected from customer bills. For tax purposes, under Reg. § 1.451-1(a), income is recognized when SPS collected this rate increase in customer bills.	
283	SchM-299 - Operating Lease	(99,869,968)	(99,869,968)					SPS adopted the leasing guidance under ASC 842 on January 1, 2019 which states that PPAs should be included in lease payments for classification and measurement purposes. As a result of the guidance, SPS recognized a right-of- use asset for book purposes. This change in accounting treatment results in a book/tax timing difference. Correspondingly, SPS records a deferred tax liability to FERC 283 related to the right-of-use asset.	
283	SchM-300 - Reg A/L - Emergency Spec Response	(406,209)	(406,209)					For book purposes, the deferral of costs directly related to the pandemic are allowed for future recovery, per the Public Utility Commission of Texas - Project No. 50664. For tax purposes, these expenses are recognized as incurred.

	Basis Difference - CIAC Elec Non Utility	12,736,048	12,736,048					This item reflects ADIT on tax only originating timing difference for taxa Contributions In Aid of Construction (CIAC).
	SchM-265 - Federal Only NOL - General SchM-264 - Federal Only NOL - Transmission	5,262,939 19,551,780		19,551,780		5,262,939		This item reflects the deferred tax asset resulting from SPS's allocated the federal NOL's classified as general.  This item reflects the deferred tax asset resulting from SPS's allocated.
	SchM-102 - Fuel Tax Credit - Inc Addback	1,493		19,551,760	1.493			This item adds back to income the amount of the credit claimed for fec
	SchM-103 - Environmental Remediation	2,925	2,925		,,,,,,			paid on fuels used in off-road equipment. For book purposes the costs incurred in the clean-up of various compa
								non-company sites from hazardous substances are accumulated and it ower a period authorized by the PUC, generally 36 months. Per IRS C Section 198, a taxpayer may elect to treat any qualified environmental remediation expenditure which is paid or incurred by the taxpayer as a which is not chargeable to a capital account. Any expenditure which is shall be allowed as a deduction for the taxable year in which it is paid or the standard or the st
	SchM-108 - Accrued Vacation Paid	1,016,350				1,016,350		For book purposes, the vacation liability is charged to book expense as employees earn vacation time. For tax purposes, a deduction can be to only when the vacation is actually taken unless it is taken within 2.5 m end of the accrual year. This item reverses the book vacation accrual current year, and takes as a deduction the amount of vacation pay act during the year plus the following 2.5 months.
90 8	SchM-109 - Employee Incentive	724,130				724,130		This item reflects the ADIT resulting from the net temporary difference incentives paid to employees accrued in one year and paid is the subs year.
90 8	SchM-111 - Post Employment Benefits - FAS 106(Short Term)	2,265,178	2,265,178					This item reflects the net of the OPEB expenses and contributions (add to taxable income) and OPEB funding and distributions (which are ded
90 \$	ChM-112 - Post Employment Benefits FAS 112	41,038				41,038		This pertains to long-term disability (LTD) benefits. Expenses accrued purposes are credited to a liability account and associated payments a to this account. For tax purposes, a deduction is allowed for payments to this liability account. This item reflects the current year changes to liability account (increase in the account balance are added to taxable and decreases in the account balance are deducted from taxable incor
	SchM-116 - Bad Debt	1,950,842	1,950,842	_				Book expense includes the amount of expected uncollectible accounts receivable. For tax purposes, only those uncollectible accounts receiv actually written off are deductible. This item reflects the net of the bac provision (added back to taxable income) and uncollectible accounts re actually written off (which are deducted from taxable income.)
	SchM-118 - Inventory Reserve	72,581	72,581					This item is the difference between the book accrual (which is an addit taxable income) and write offs (deductions from taxable income).
90 8	SchM-119 - Electric Vehicle Credit	3,750			3,750			This item reflects the deferred tax asset resulting from the excess or u Electric Vehicle Credit. This item will be reversed at such time that the consolidated income tax liability becomes great enough to begin using carryforward credits.
90 8	SchM-127 - Litigation Reserve	22,256	22,256					This item reflects the ADIT resulting from the net temporary timing diffe between book recognition of possible outcomes from litigation and the payments made.

(A) (B) (C) (D) (E) (F) (G) (H) Total Included in Ratebase (I) Retail, Production Avg Balance Transmission Plant Labor & Other Acc. No. Identification from WsD Related Related Related Related (E)+(F)+(G) Description

190 SchM-130 - Deferred Compensation Plan Reserve	1,305,897			1,305,897	For book purposes, costs are accrued for a retirement plan for officers and
130 Schmi 130 - Deletted Compensation Flam (eserve	1,303,097			1,505,097	certain key employees and currently charged against book income. Payments made to these retirees from the SERP Trust are not charged against book income but rather they are charged against the Trust account. IRC Section 404(a) allows a deduction to the employer for amounts paid to employees (retirees) in the year that the payment is includable in the employees (retirees) gross income. This amount is the net of the accrual (added back to taxable income) and payments (which are deducted from taxable income).
190 SchM-134 - Non-Qualified Pension Plans - 190	89,189			89,189	For book purposes an accrual is made to expense the supplemental compens for executives as instructed by FAS 158 - Employers' Accounting for Defined Benefit Plans and Other Postretirement Plans using short-term and long-term OCI; and for the utilities the amounts that are recoverable through the rate process and not currently in income are recorded as regulatory assets and regulatory liabilities. Periodic funds to the plans are made with a debit to these accounts and credits to cash. Per IRS Code Sec. 404(a) a deduction is allowed to the employer when payments are made.
190 SchM-136 - Performance Share Plan	112,950			112,950	For book purposes, the Performance Share Plan (performance awards are granted at the beginning of a three-year cycle) expense is recorded currently over the plan period with a concurrent entry to liability accounts (short-term) and (long-term) and paid out at the end of the performance cycle. Per IRS Code Sec. 83(h) there shall be a deduction allowed under section 162 for the taxable year of the employer in which the option is exercised and value of such option included in the taxable income of the employee. In addition, any cash settlem is deductible under section 162 in the year of payment per IRS Code Sec. 461
190 SchM-137 - R&E Credit	12,523,322	12,523,322			This item reflects the deferred tax asset resulting from the excess or unused increased Research Expenditures ("R&E") Credit. This item will be reversed a such time that the consolidated income tax liability becomes great enough to begin using carryforward credits.
190 SchM-146 - State Tax Deduction Cash Vs Accrual - 190	107,070		107,070		This item reflects ADIT on the temporary timing difference between state incortaxes accrued and state income taxes paid.
190 SchM-152 - Rate Refund	497,123	497,123			Book revenue is adjusted currently for estimated amounts that will be refunded customers in the future. For tax purposes, only refunds actually made to customers are deductions. This tax adjustment reverses the book income adjustments.
190 SchM-174 - New Hire Retention Credit	5,500			5,500	This item adds back to income the amount of the credit claimed for federal tax purposes.
190 SchM-178 - Interest Income on Disputed Tax	406,359	406,359			This item reflects ADIT on the net temporary timing difference between net interest income on proposed audit adjustments that have been charged to boo income and deducted for tax purposes, but cash has not yet been received.
190 SchM-179 - DSM/CIP	335,181	335,181			This item reflects ADIT on the net temporary timing difference between DSM expenditures being deducted for tax purposes and those DSM expenditures being expensed/amortized for book.
190 SchM-186 - Deferred Fuel Costs	2,268,745	2,268,745			This item reflects the ADIT resulting from the net temporary timing difference between inclusion of cost for electric generation and eventual recovery of cost from customers.
190 SchM-187 - Reg Asset/Liability Transmission Attachment O	105,480	105,480			This item reflects ADIT on the net temporary timing difference between the calculation of rates and recovery of rates for the FERC Transmission formula rates.
190 SchM-188 - Contributions Carryover	33,280	33,280			For book purposes, charitable contributions are deducted currently from book income. For tax purposes, contributions are deductible subject to certain limitations. This item adds back to taxable income, contributions deemed to in excess of such limitations. This timing difference will reverse at such time when taxable income is sufficient enough.

190	SchM-189 - OCI Treasury	355,617	355,617		1			For book purposes, items reported in Other Comprehensive Income (OCI) on the
					1			balance sheet must be reported net of tax. One such item included in OCI for
					1			SPS relates to derivative instruments used to mitigate market risk and to enhance operations not qualifying for the normal purchases and normal sales
					1			exception, as defined by FAS No. 133 (Accounting for Derivative Instruments
					1			and Hedging Activities), which are recorded at fair value. This ADFIT amount
					1			reflects the taxes on OCI related to these types of derivative instruments.
190	SchM-205 - State Only NOL	2,248,856	2,248,856					This item reflects the deferred tax asset resulting from SPS's allocated portion of
	·							the following states NOLs for Oklahoma, New Mexico, and Oklahoma.
190	SchM-207 - Mark to Market Adjust	119,723	119,723					For book purposes, in complying with FASB Statement 133, "Accounting for
					1			Derivative Instruments and Hedging Activities", SPS has elected to treat most
					1			activity as balance sheet only (the "Settlement Basis") with entries being made
					1			between various asset and liability accounts and concurrent entries to other
					1			comprehensive income. However, with regards to wholesale regulated energy
					1			trading activities, SPS has elected "Mark to Market" accounting which requires
					1			periodic recognition of income or expense on the income statement with concurrent entries to asset accounts. For tax purposes, the Company has not
					1			elected to follow IRS Code Sec. 475, "Mark to market accounting method for
					1			dealers in securities". This reconciling item reverses the book amounts for "Mar
					1			to Market" income or expense for the current period.
190	SchM-226 - Performance Recognition Award	15,022				15,022		The recipient of a Performance Recognition Award has up to two years to use
					1			the award. For book purposes, a liability is recorded on the books and reversed
					1			when the award is used. For tax purposes, per Reg. Sec. 1.461-1(a)(2)(i), the
					1			award is deductible when economic performance has occurred; therefore, a
								book/tax difference exists
190	SchM-261 - Section 59e Adjustment	13,492,532			13,492,532			This pertains to Section 174 R&E expenses. Expenses are capitalized and
								depreciated over the related assets useful life for book purposes. For tax
								purposes, these are allowed to be deducted straight-line over a 10 year period.
100	SchM-263 - Federal Only NOL - Production	6,014,787	6,014,787					This item reflects the difference between these two.  This item reflects the deferred tax asset resulting from SPS's allocated portion of
190	OGNIVI-200 - I GUGIAI ONLY NOL - FIGURGION	0,014,787	0,014,787					the federal NOL's classified as production.
190	SchM-266 - Federal Only NOL - Distribution	6,390,711	6,390,711					This item reflects the deferred tax asset resulting from SPS's allocated portion of
400	SohM 200 Operating Loops	00 000 000	00 000 000					the federal NOL's classified as distribution.  SPS adopted the leasing guidance under ASC 842 on January 1, 2019 which
190	SchM-299 - Operating Lease	99,869,968	99,869,968		1			
					1			states that PPAs should be included in lease payments for classification and measurement purposes. As a result of the guidance, SPS recognized a right-of
					1			use asset for book purposes. This change in accounting treatment results in a
					1			book/tax timing difference. Correspondingly, SPS records a deferred tax liability
								to FERC 283 related to the right-of-use asset.
190	SchM-PTC - Deferred PTCs - Hale	158,099,011	158,099,011					The federal renewable electricity production tax credit (PTC) is an inflation-
					1			adjusted per-kilowatt-hour (kWh) tax credit for electricity generated by qualified
					1			energy resources and sold by the taxpayer to an unrelated person during the
					1			taxable year. The credit is available for 10-years after the facility is placed in
					1			service. If the Company is unable to use its current year PTCs against its currer
					1			year tax liability, PTCs may be carried forward for 20 years.
400	C-I-M DTC D-frI DTC- C	89,145,524	00 445 504					The first state of the state of
190	SchM-PTC - Deferred PTCs - Sagamore	89,145,524	89,145,524		1			The federal renewable electricity production tax credit (PTC) is an inflation- adjusted per-kilowatt-hour (kWh) tax credit for electricity generated by qualified
					1			energy resources and sold by the taxpayer to an unrelated person during the
					1			taxable year. The credit is available for 10-years after the facility is placed in

~		, , , , , , , , ,	(-, -, -,,					case/restructuring costs deducted for tax purposes and rate case/restructuring
283	SchM-146 - State Tax Deduction Cash Vs Accrual - 190	(97,578)			(97,578)			costs deducted for book purposes.  This item reflects ADIT on the temporary timing difference between state incom
		(21,210)			(21,210)			taxes accrued and state income taxes paid.
283	SchM-147 - State Tax Deduction Cash Vs Accrual - 283	-	-					

283	SchM-179 - DSM/CIP	(1,889)	(1,889)					This item reflects ADIT on the net temporary timing difference between DSM expenditures being deducted for tax purposes and those DSM expenditures
283	SchM-186 - Deferred Fuel Costs	(34,260,228)	(34,260,228)					being expensed/amortized for book.  This item reflects the ADIT resulting from the net temporary timing difference
200	GOTINI-100 - DOTOTOU FUOL GOSES	(04,200,220)	(04,200,220)					between inclusion of cost for electric generation and eventual recovery of costs from customers.
283	SchM-187 - Reg Asset/Liability Transmission Attachment O	(77,069)	(77,069)					This item reflects ADIT on the net temporary timing difference between the calculation of rates and recovery of rates for the FERC Transmission formula rates.
283	SchM-189 - OCI Treasury	(600)	(600)					Trates.  For book purposes, items reported in Other Comprehensive Income (OCI) on the balance sheet must be reported net of tax. One such item included in OCI for SPS relates to derivative instruments used to mitigate market risk and to enhance operations not qualifying for the normal purchases and normal sales exception, as defined by FAS No. 133 (Accounting for Derivative Instruments and Hedging Activities), which are recorded at fair value. This ADFIT amount reflects the taxes on OCI related to these types of derivative instruments.
283	SchM-192 - Texas Margin Tax	(852,434)	(852,434)					Texas Gross Margin Tax – For book purposes, per Statement of Financial Accounting Standards (FAS) No. 109 (Accounting for Income Taxes), regulated enterprises are required to adjust a deferred tax liability or asset for enacted changes in tax rates (i.e., ADIT balances must be calculated using the most recent income tax rates in effect as of the balance sheet date). Since under GAAP, the Texas Gross Margin Tax is considered an income tax, this ADIT balances reflects the difference between deferred taxes calculated on selected non-plant timing differences at a composite rate incorporating the Texas Gross Margin tax (apportionment and rate) and deferred taxes calculated on selected non-plant timing differences at a composite rate excluding the Texas Gross Margin tax (apportionment and rate).
283	SchM-195 - Renewable Energy Standard	(380,172)	(380,172)					margin tax (apportunitient alto rate); For book purposes the value (real or imputed) of renewable energy certificates (REC) acquired from various windpower producers are recorded as an offset to deferred costs which are set for recovery from customers, this offset to deferred cost expense is then held in inventory until such time as it is also recovered from customers. These REC's may also be sold to other companies which need their to meet state mandates for renewable energy.
283	SchM-207 - Mark to Market Adjust	(325,131)	(325,131)					For book purposes, in complying with FASB Statement 133, "Accounting for Derivative Instruments and Hedging Activities", SPS has elected to treat most activity as balance sheet only (the "Settlement Basis") with entries being made between various asset and liability accounts and concurrent entries to other comprehensive income. However, with regards to wholesale regulated energy trading activities, SPS has elected "Mark to Market" accounting which requires periodic recognition of income or expense on the income statement with concurrent entries to asset accounts. For tax purposes, the Company has not elected to follow IRS Code Sec. 475, "Mark to market accounting method for dealers in securities". This reconciling item reverses the book amounts for "Mark to Market" income or expense for the current period.
283	SchM-275 - Reg Asset - Miscellaneous	(12,110,570)	(12,110,570)					SPS has certain regulatory recovery mechanisms that are tax sensitive. For boo purposes, income is accrued to a regulatory asset and then amontized off as collected from customer bills. For tax purposes, under C.F.R. § 1.451-1(a), income is recognized when SPS collects this rate increase in customer bills.
283	SchM-293 - Rate Change	(11,306,264)	(11,306,264)					This timing difference is the nonplant gross-up on the excess deferred tax balance related to TCJA that will be amortized back to customers. Amortization periods are determined by the Commission and determine the rate at which portions of this timing difference will reverse.
283	SchM-295 - Rate Change on Fin 48 Temp Items - Reg	1	1					This adjustment represents the federal TCJA rate change applied to temporary uncertain tax positions as reflected as a component of income tax expense.
283	SchM-299 - Operating Lease	(100,213,027)	(100,213,027)					SPS adopted the leasing guidance under ASC 842 on January 1, 2019 which states that PPAs should be included in lease payments for classification and measurement purposes. As a result of the guidance, SPS recognized a right-of use asset for book purposes. This change in accounting treatment results in a book/tax timing difference. Correspondingly, SPS records a deferred tax liability to FERC 283 related to the right-of-use asset.
283	SchM-300 - Reg A/L - Emergency Spec Response	(880,808)	(880,808)					For book purposes, the deferral of costs directly related to the pandemic are allowed for future recovery, per the Public Utility Commission of Texas - Project No. 50664. For tax purposes, these expenses are recognized as incurred.
283	Liberalized Depreciation - Non-Utility	(68,594)	(68,594)					Property basis difference resulting from accelerated tax depreciation versus bod depreciation.

	Basis Difference - Distribution	7,047,478	7,047,478	related	rented	related	(27-(17-(0)	This item reflects ADIT on tax only originating timing differences for avoided cost interest, pension and benefits capitalized, and ESOP dividends capitalized.
190	Basis Difference - Transmission	23,182,521		23,182,521				This item reflects ADIT on tax only originating timing differences for avoided cost interest, pension and benefits capitalized, and ESOP dividends capitalized.
190	Basis Difference - Production	13,787,813	13,787,813					This item reflects ADIT on tax only originating timing differences for avoided cos interest, pension and benefits capitalized, and ESOP dividends capitalized.
190	Basis Difference - General	951,092				951,092		This item reflects ADIT on tax only originating timing differences for avoided cos interest, pension and benefits capitalized, and ESOP dividends capitalized.
190	Basis Difference - Intangible	32,958				32,958		This item reflects ADIT on tax only originating timing differences for avoided cos interest, pension and benefits capitalized, and ESOP dividends capitalized.
190	Basis Difference - CIAC Distribution	20,107,167	20,107,167					This item reflects ADIT on tax only originating timing differences for avoided cos interest, pension and benefits capitalized, and ESOP dividends capitalized.
190	Basis Difference - CIAC Transmission	11,885,239		11,885,239				This item reflects ADIT on tax only originating timing difference for taxable Contributions In Aid of Construction (CIAC).
190	Basis Difference - CIAC Production	15,216	15,216					This item reflects ADIT on tax only originating timing difference for taxable Contributions In Aid of Construction (CIAC).
190	Basis Difference - CIAC General	8,749				8,749		This item reflects ADIT on tax only originating timing difference for taxable
190	Basis Difference - CIAC Elec Non Utility	13,923,689	13,923,689					Contributions In Aid of Construction (CIAC).  This item reflects ADIT on tax only originating timing difference for taxable
190	SchM-265 - Federal Only NOL - General	10,166				10,166		Contributions In Aid of Construction (CIAC).  This item reflects the deferred tax asset resulting from SPS's allocated portion of
	SchM-264 - Federal Only NOL - Transmission	7,251,409		7,251,409				the federal NOL's classified as general.  This item reflects the deferred tax asset resulting from SPS's allocated portion of
	·			7,201,409	0.404			the federal NOL's classified as transmission.
	SchM-102 - Fuel Tax Credit - Inc Addback SchM-103 - Environmental Remediation	2,101	233,569		2,101			This item adds back to income the amount of the credit claimed for federal tax paid on fuels used in off-road equipment.  For book purposes the costs incurred in the clean-up of various company and
								non-company sites from hazardous substances are accumulated and amortized over a period authorized by the PUC, generally 36 months. Per IRS Code Section 198, a taxpayer may elect to treat any qualified environmental remediation expenditure which is paid or incurred by the taxpayer as an expense which is not chargeable to a capital account. Any expenditure which is so treate shall be allowed as a deduction for the taxable year in which it is paid or incurred.
190	SchM-108 - Accrued Vacation Paid	1,101,534				1,101,534		For book purposes, the vacation liability is charged to book expense as employees earn vacation time. For tax purposes, a deduction can be claimed only when the vacation is actually taken unless it is taken within 2.5 months of the end of the accrual year. This item reverses the book vacation accrual for the current year, and takes as a deduction the amount of vacation pay actually used during the year plus the following 2.5 months.
190	SchM-109 - Employee Incentive	734,844				734,844		This item reflects the ADIT resulting from the net temporary difference on the incentives paid to employees accrued in one year and paid is the subsequent year.
190	SchM-111 - Post Employment Benefits - FAS 106(Short Term)	2,477,837	2,477,837					This item reflects the net of the OPEB expenses and contributions (added back to taxable income) and OPEB funding and distributions (which are deducted).
190	SchM-112 - Post Employment Benefits FAS 112	43,075				43,075		This pertains to long-term disability (LTD) benefits. Expenses accrued for book purposes are credited to a liability account and associated payments are debited to this account. For lax purposes, a deduction is allowed for payments charged to this liability account. This item reflects the current year changes to the LTD liability account (increase in the account balance are added to taxable income and decreases in the account balance are deducted from taxable income).
190	SchM-116 - Bad Debt	2,859,046	2,859,046					Book expense includes the amount of expected uncollectible accounts receivable. For tax purposes, only those uncollectible accounts receivable actually written off are deductible. This item reflects the net of the bad debt provision (added back to taxable income) and uncollectible accounts receivable actually written off (which are deducted from taxable income.)
190	SchM-118 - Inventory Reserve	65,053	65,053					This item is the difference between the book accrual (which is an addition to taxable income) and write offs (deductions from taxable income).
	SchM-119 - Electric Vehicle Credit	3,750			3,750			This item reflects the deferred tax asset resulting from the excess or unused Electric Vehicle Credit. This item will be reversed at such time that the consolidated income tax liability becomes great enough to begin using carryforward credits.
	SchM-127 - Litigation Reserve	-				-		This item reflects the ADIT resulting from the net temporary timing differences between book recognition of possible outcomes from litigation and the actual payments made.
190	SchM-130 - Deferred Compensation Plan Reserve	1,276,376				1,276,376		For book purposes, costs are accrued for a retirement plan for officers and certain key employees and currently charged against book income. Payments made to these retirees from the SERP Trust are not charged against book income but rather they are charged against the Trust account. IRC Section 404(a) allows a deduction to the employer for amounts paid to employees (retirees) in the year that the payment is includable in the employees (retirees) gross income. This amount is the net of the accrual (added back to taxable income) and payments (which are deducted from taxable income).

190 SchM-134 - Non-Qualified Pension Plans - 190	85,521			85,521	For book purposes an accrual is made to expense the supplemental compension for executives as instructed by FAS 158 - Employers' Accounting for Defined Benefit Plans and Other Postretirement Plans using short-term and long-term OCI; and for the utilities the amounts that are recoverable through the rate process and not currently in income are recorded as regulatory assets and regulatory liabilities. Periodic funds to the plans are made with a debit to these accounts and credits to cash. Per IRS Code Sec. 404(a) a deduction is allowed to the employer when payments are made.
190 SchM-136 - Performance Share Plan	83,911			83,911	For book purposes, the Performance Share Plan (performance awards are granted at the beginning of a three-year cycle) expense is recorded currently over the plan period with a concurrent entry to liability accounts (short-term) and (long-term) and paid out at the end of the performance cycle. Per IRS Code Sec. 83(h) there shall be a deduction allowed under section 162 for the taxable year of the employer in which the option is sexerised and value of such option is included in the taxable income of the employee. In addition, any cash settlement is deductible under section 162 in the year of payment per IRS Code Sec. 461.
190 SchM-137 - R&E Credit	13,463,207	13,463,207			This item reflects the deferred tax asset resulting from the excess or unused Increased Research Expenditures ("R&E") Credit. This item will be reversed at such time that the consolidated income tax liability becomes great enough to begin using carryforward credits.
190 SchM-146 - State Tax Deduction Cash Vs Accrual - 190	215,462		215,462		This item reflects ADIT on the temporary timing difference between state income taxes accrued and state income taxes paid.
190 SchM-152 - Rate Refund	1,909,390	1,909,390			Book revenue is adjusted currently for estimated amounts that will be refunded to customers in the future. For tax purposes, only refunds actually made to customers are deductions. This tax adjustment reverses the book income adjustments.

190	SchM-171 - Employee Retention	1,010			1,01	0	For book purposes employee retention is expensed and accrued monthly. Cash
		1,515			.,		payments to the employee are made at a later date provided the employee
							meets the service condition and certain performance conditions outlined in the
							employee retention agreement. Employee retention payments are not considered part of the employee's salary. For tax purposes, employee retention
							is deductible when paid or incurred under Reg. §1.461-1(a)(2)(i), which states
							that a liability is incurred and deductible in the year the all events test is met,
							which consists of the following criteria: 1) liability must be fixed as of the end of
							the year, 2) the amount must be determined with reasonable accuracy; and 3)
							economic performance has occurred. Since economic performance has not occurred at the end of the year, the tax deduction shall occur in the year the
							payment is made.
190	SchM-174 - New Hire Retention Credit	5,500			5,50	0	This item adds back to income the amount of the credit claimed for federal tax
							purposes.
190	SchM-178 - Interest Income on Disputed Tax	456,696	456,696				This item reflects ADIT on the net temporary timing difference between net interest income on proposed audit adjustments that have been charged to book
							income and deducted for tax purposes, but cash has not yet been received.
190	SchM-179 - DSM/CIP	93,401	93,401				This item reflects ADIT on the net temporary timing difference between DSM expenditures being deducted for tax purposes and those DSM expenditures
							being expensed/amortized for book.
190	SchM-186 - Deferred Fuel Costs	-	-				This item reflects the ADIT resulting from the net temporary timing difference
							between inclusion of cost for electric generation and eventual recovery of costs
400	C-tM 407. D-r At/li-bility Tii Allbt O	4 000 750	4 000 750				from customers.
190	SchM-187 - Reg Asset/Liability Transmission Attachment O	1,668,753	1,668,753				This item reflects ADIT on the net temporary timing difference between the calculation of rates and recovery of rates for the FERC Transmission formula
							rates.
190	SchM-188 - Contributions Carryover	32,131	32,131				For book purposes, charitable contributions are deducted currently from book
							income. For tax purposes, contributions are deductible subject to certain
							limitations. This item adds back to taxable income, contributions deemed to be in excess of such limitations. This timing difference will reverse at such time
							when taxable income is sufficient enough.
190	SchM-189 - OCI Treasury	316,586	316,586				For book purposes, items reported in Other Comprehensive Income (OCI) on the
	,	,					balance sheet must be reported net of tax. One such item included in OCI for
							SPS relates to derivative instruments used to mitigate market risk and to
							enhance operations not qualifying for the normal purchases and normal sales
							exception, as defined by FAS No. 133 (Accounting for Derivative Instruments and Hedging Activities), which are recorded at fair value. This ADFIT amount
							reflects the taxes on OCI related to these types of derivative instruments.
190	SchM-195 - Renewable Energy Standard	580,932	580,932				For book purposes the value (real or imputed) of renewable energy certificates
	•						(REC) acquired from various windpower producers are recorded as an offset to
							deferred costs which are set for recovery from customers, this offset to deferred
							cost expense is then held in inventory until such time as it is also recovered from
							customers. These REC's may also be sold to other companies which need ther to meet state mandates for renewable energy.
190	SchM-205 - State Only NOL	2,656,345	2,656,345				This item reflects the deferred tax asset resulting from SPS's allocated portion of
	•	,,.	,,.				the following states NOLs for Oklahoma, New Mexico, and Oklahoma.
190	SchM-207 - Mark to Market Adjust	-	-				For book purposes, in complying with FASB Statement 133, "Accounting for
							Derivative Instruments and Hedging Activities", SPS has elected to treat most activity as balance sheet only (the "Settlement Basis") with entries being made
							between various asset and liability accounts and concurrent entries to other
							comprehensive income. However, with regards to wholesale regulated energy
							trading activities, SPS has elected "Mark to Market" accounting which requires
							periodic recognition of income or expense on the income statement with
							concurrent entries to asset accounts. For tax purposes, the Company has not
							elected to follow IRS Code Sec. 475, "Mark to market accounting method for dealers in securities". This reconciling item reverses the book amounts for "Mark
							to Market" income or expense for the current period.
190	SchM-226 - Performance Recognition Award	20,325			20,32	5	The recipient of a Performance Recognition Award has up to two years to use
							the award. For book purposes, a liability is recorded on the books and reversed
							when the award is used. For tax purposes, per Reg. Sec. 1.461-1(a)(2)(i), the
							award is deductible when economic performance has occurred; therefore, a book/tax difference exists
190	SchM-261 - Section 59e Adjustment	14,216,754		14	216,754		Per IRS Code Sec. 461 the expenses for any amounts paid to retail customers
130	22. Ossion oss rajasanom	1,210,734		14,			for the Distributive Generation Program are deducted in the current tax year for
							taxable income.
190	SchM-262 - Federal Only NOL - Non Operating	(356,615)	(356,615)				This item reflects the deferred tax asset resulting from SPS's allocated portion of the federal NOL's classified as non-operating.
190	SchM-263 - Federal Only NOL - Production	27,024,254	27,024,254				This item reflects the deferred tax asset resulting from SPS's allocated portion of the federal NOL's classified as production.
190	SchM-266 - Federal Only NOL - Distribution	2,269,573	2,269,573				This item reflects the deferred tax asset resulting from SPS's allocated portion of
190	SchM-293 - Rate Change	1,303,147	1,303,147				the federal NOL's classified as distribution.  This timing difference is the nonplant gross-up on the excess deferred tax
	, and the second		,,				balance related to TCJA that will be amortized back to customers. Amortization
							periods are determined by the Commission and determine the rate at which
100	SchM-299 - Operating Lease	100,213,027	100,213,027				portions of this timing difference will reverse.
190	Soniwi-255 - Operating Lease	100,213,027	100,213,027				SPS adopted the leasing guidance under ASC 842 on January 1, 2019 which states that PPAs should be included in lease payments for classification and
							measurement purposes. As a result of the guidance, SPS recognized a right-of-
							use asset for book purposes. This change in accounting treatment results in a
							book/tax timing difference. Correspondingly, SPS records a deferred tax liability
							to FERC 283 related to the right-of-use asset.

190 SchM-301 - Cares Act Payroll Deferral	268,104				268,104		Section 2302 of the CARES Act passed in 2020 provided that employers may
190 Scriw-301 - Cales Act Faylor Deletral	200,104				200,104		defer the deposit and payment of the employer's portion of Social Security taxe
							The deferral applies to deposits and payments of the employer's share of Soci
							Security tax that would otherwise be required to be made during the period
							beginning on March 27, 2020, and ending December 31, 2020. 50% of these
							amounts are required to be paid by 12/31/2021 and the remaining 50% by
							12/31/2022, which Benefits Accounting has confirmed is our tentative plan for
							repayment. For book purposes, the employer's portion of FICA Social Security
							taxes are accrued as incurred. For tax purposes, these taxes are deductible as
							paid. This reconciling item adds back to taxable income the accrued book
							expenses that won't be paid until 2021. This timing difference creates a deferre
							tax asset for tax purposes.
190 SchM-PTC - Deferred PTCs - Hale	152,818,644	152,818,644					The federal renewable electricity production tax credit (PTC) is an inflation-
							adjusted per-kilowatt-hour (kWh) tax credit for electricity generated by qualified
							energy resources and sold by the taxpayer to an unrelated person during the
							taxable year. The credit is available for 10-years after the facility is placed in
							service. If the Company is unable to use its current year PTCs against its curre
							year tax liability, PTCs may be carried forward for 20 years.
190 SchM-PTC - Deferred PTCs - Sagamore	77,833,337	77,833,337					The federal renewable electricity production tax credit (PTC) is an inflation-
							adjusted per-kilowatt-hour (kWh) tax credit for electricity generated by qualified
							energy resources and sold by the taxpayer to an unrelated person during the
							taxable year. The credit is available for 10-years after the facility is placed in
							service. If the Company is unable to use its current year PTCs against its curre
							year tax liability, PTCs may be carried forward for 20 years.

#### Notes:

The Formula Rate shall include a credit to rate base for each unfunded reserve. An unfunded reserve is a reserve where an escrow, trust, or restricted account has not been established for a fund whose balance is collected from customers through cost accruals to accounts that are recovered under the Formula Rate. Each unfunded reserve will be included on the lines above. The allocator in Col. (9) will be the same allocator used in the Formula Rate for the cost accruals to the account that is recovered under the Formula Rate.

# . Calculate Return and Income Taxes with hypothetical 100 basis point ROE increase.

### Line A. Determine "R" with hypothetical 100 basis point increase in ROE.

No.					
1	ROE w/o incentive	s (From Page	e 5, In 162)		10.50%
2	ROE with addition	al 100 basis p		11.50%	
3	Determine R ( cos	st of long term	debt, cost of preferred stock and pe	ercent is from I	Page 5, Ins 160 through162)
4		%	Cost	V	/eighted cost
5	Long Term Debt	45.67%	0.0412		0.0188
6	Preferred Stock	0.00%	0.0000		0.0000
7	Common Stock	54.33%	0.1150		0.0625
8				R =	0.0813

### B. Determine Return using "R" with hypothetical 100 basis point ROE increase.

9	Rate Base (From Page 3, In	2,687,332,383
10	R (from A. above)	0.0813
11	Return (Rate Base x R)	218,480,123

#### C. Determine Income Taxes using Return with hypothetical 100 basis point ROE increase.

12	Return (from B. above)	218,480,123
13	CIT (From Page 4, In 131)	22.01%
14	Income Tax Calculation (Re	48,087,475
15	ITC Adjustment (From Page	-
16	Income Taxes	48,087,475

# II. Calculate Net Plant Carrying Charge Rate (Fixed Charge Rate or FCR) with hypothetical 100 basis point ROE increase

### Line A. Determine Net Revenue Requirement less return and Income Taxes.

VU.		
17	Net Revenue Requirement (From Page 2, In 33)	390,360,681
18	Return (From Page 4, In 139)	203,699,795
19	Income Taxes (From Page 4, In 138)	42,084,868
20	Net Revenue Requirement, Less Return and Taxes	144,576,019

#### B. Determine Net Revenue Requirement with hypothetical 100 basis point increase in ROE.

21	Net Revenue Requirement, Less Return and Taxes	144,576,019
22		218,480,123
23	Income Taxes (from I.C. above)	48,087,475
24	Net Revenue Requirement, with 100 Basis Point ROE increase	411,143,617
25	Depreciation (From Page 4, In 114)	90,184,496
26	Net Rev. Reg, w/100 Basis Point ROE increase, less Depreciation	320,959,121

#### C. Determine FCR with hypothetical 100 basis point ROE increase.

21	Net transmission riant (rion rage 3, iii 02)	3,102,704,041	
28	Net Revenue Requirement, with 100 Basis Point ROE increase	411,143,617	
29	FCR with 100 Basis Point increase in ROE	12.92%	
30	Net Rev. Reg. w/100 Basis Point ROE increase, less Dep.	320.959.121	
31	FCR with 100 Basis Point ROE increase, less Depreciation	10.08%	(use when no CIAC is associated with facilities receiving incentives)
32	FCR w/o 100 Basis Point ROE increase, less Depreciation	9.43%	(From Page 2, In 40)
33	FCR w/o Return, Income Taxes and Depreciation	0.65%	(use when CIAC is associated with facilities receiving incentives)

### III. Determine the Additional Revenue Requirement and Revenue Credit for facilities receiving incentives

#### A. Facilities receiving incentives accepted by FERC in Docket No.

The calculated Additional Revenue Requirement and Revenue Credit shown below are only valid for Investment Years matching Current Year. Values prior and subsequent to the Current Year will change as Attachment O is updated. These changes will not result in a refund or additional charge related to years prior to the Current Year.

Beginning Balance = Investment in first year and prior year Ending Balance, thereafter Depreciation Expense = Straight line depreciation equal to Investment divided by Useful Life Ending Balance = Beginning Balance - Depreciation Expense Revenue Requirement = FCR \* Beginning Balance plus Depreciation Expense, adjusted by Service Month divided by 12 in the first year Additional Revenue Credit = Revenue Requirement wincentives less w/o incentive for the year Additional Revenue Credit = Revenue Requirement two incentives
