APPENDIX 1 to Revised LGIP
INTERCONNECTION REQUEST FOR A
LARGE GENERATING FACILITY

1. The undersigned Interconnection Customer submits this request to interconnect its Large Generating Facility with Transmission Provider's Transmission System pursuant to a Tariff.

2. This Interconnection Request is for (check one):
   _____A proposed new Large Generating Facility.
   _____An increase in the generating capacity or a Material Modification of an existing Generating Facility.
   _____A Generating Facility proposed for inclusion in a resource solicitation process.

3. The type of interconnection service requested (check one):
   _____Energy Resource Interconnection Service
   _____Network Resource Interconnection Service

4. Interconnection Customer provides the following information:
   a. Address or location or the proposed new Large Generating Facility site (to the extent known) or, in the case of an existing Generating Facility, the name and specific location of the existing Generating Facility;
   b. Maximum summer at ____ degrees C and winter at ____ degrees C megawatt electrical output of the proposed new Large Generating Facility or the amount of megawatt increase in the generating capacity of an existing Generating Facility;
   c. General description of the equipment configuration;
   d. Commercial Operation Date (Day, Month, and Year);
   e. Name, address, telephone number, and e-mail address of Interconnection Customer's contact person;
   f. Approximate location of the proposed Point of Interconnection (optional);
   g. Interconnection Customer Data (set forth in Attachment A)
   h. Primary frequency response operating range for electric storage resources.
   i. Requested capacity (in MW) of Interconnection Service (if lower than the Generating Facility Capacity).

5. Interconnection Customer provides applicable study deposit amount as specified in the Revised LGIP.

   $75,000 for requests of less than 50 MW; or
   $150,000 for requests of 50 MW and Greater, but less than 200 MW; or
   $250,000 for requests of 200 MW and greater

6. Interconnection Customer provides Readiness Milestone 1 (M1) as specified in the Revised LGIP.

   M1 is satisfied by any one of the three options below (also described in 3.4.1.f of the Revised LGIP) at Interconnection Customer's option. M1 may also be satisfied by

LGIP, 0.6.0. eff. 12/5/2019
providing additional security described in Section 7.7.5 in lieu of providing one of the three options to demonstrate readiness.

i. Executed term sheet (or comparable evidence) related to a contract, binding upon the parties to the contract, for sale of (i) the constructed Generating Facility, (ii) the Generating Facility’s energy, or (iii) the Generating Facility’s ancillary services if the Generating Facility is an electric storage resource; where the term of sale is not less than five (5) years;

ii. Reasonable evidence the project has been selected in a Resource Plan or Resource Solicitation Process; or

iii. Provisional Large Generator Interconnection Agreement accepted for filing with FERC. Such an agreement shall not be suspended and shall include a commitment to construct the Generating Facility.

7. Interconnection Customer provides security equal to one times the study deposit described in Section 3.1 of the Revised LGIP in the form of an irrevocable letter of credit or cash.

8. If requesting NRIS: Interconnection Customer provides the expected point of delivery to deliver within the Transmission Provider’s Control Area or to an adjoining Control Area if the Generating Facility is not designated a Network Resource pursuant to Section 30.2 of the Tariff.

9. Interconnection Customer provides Evidence of Site Control as specified in the Revised LGIP and Transmission Provider’s business practices posted on OASIS.

10. This Interconnection Request shall be submitted to the representative indicated below:

    [To be completed by Transmission Provider]

11. Representative of Interconnection Customer to contact:

    [To be completed by Interconnection Customer]

12. This Interconnection Request is submitted by:

    Name of Interconnection Customer: ____________________________

    By (signature): ____________________________

    Name (type or print): ____________________________

    Title: ____________________________

    Date: ____________________________

Present Tap Setting ______________________________________________________

If more than one transformer stage is used to deliver the output from the proposed Generating Facility to the Transmission System, please provide the information above for each transformer or transformer type.

IMPEDANCE

Positive
\[ Z_1 \text{ (on self-cooled kVA rating) } \] _______________%_______________X/R

Zero
\[ Z_0 \text{ (on self-cooled kVA rating) } \] _______________%_______________X/R

EXCITATION SYSTEM DATA

Identify appropriate IEEE model block diagram of excitation system and power system stabilizer (PSS) for computer representation in power system stability simulations and the corresponding excitation system and PSS constants for use in the model.

GOVERNOR SYSTEM DATA

Identify appropriate IEEE model block diagram of governor system for computer representation in power system stability simulations and the corresponding governor system constants for use in the model.

WIND AND OTHER NON-SYNCHRONOUS GENERATORS

Number of generators to be interconnected pursuant to this Interconnection Request: __________

Elevation: __________________ Single Phase ________ Three Phase ________
Inverter manufacturer, model name, number, and version:
_________________________________________________________________

List of adjustable setpoints for the protective equipment or software:
_________________________________________________________________

Note: A completed General Electric Company Power Systems Load Flow (PSLF) data sheet or other compatible formats, such as IEEE and PTI power flow models, must be supplied with the Interconnection Request. If other data sheets are more appropriate to the proposed device, then they shall be provided and discussed at Scoping Meeting.

Project Information: Site Control and Adequacy

Total acres required to construct the Generating Facility: _______________________________

Total acres under site control for the Generating Facility at the time of application:
________________________________________

Is Site Control required for Interconnection Facilities, i.e. transmission gen-tie or substation, to interconnect the Generating Facility? ___ Y ___ N

If yes, how many miles of gen-tie right-of-way are required? _______
What is the total number of acres required to build the gen-tie? _______
How many miles of gen-tie right-of-way are under Site Control at the time of this application?
_________

List any local, state, or federal government permits required to construct the Generating Facility and any applicable Interconnection Facilities, i.e. transmission gen-tie:
___________________________________________________________________________
