

XCEL ENERGY HOLDING PUBLIC OPEN HOUSE ON APRIL 28

The public is invited to an informational open house regarding Xcel Energy's 69 kilovolt (kV) underground transmission rebuild project.

When: April 28, 5 to 7 p.m.
Presentation scheduled to begin at 6 p.m.

Where: Red Wing Public Library (Foot Room)
225 East Ave
Red Wing, MN 55066

Project Overview

Xcel Energy is replacing the 1.5 mile section of existing 69kV underground transmission line located between Hill Street and Xcel Energy's Red Wing Generating Station. The existing line was installed in 1976 and has reached the end of its design lifespan. No power outages will be associated with this work.

This project is being completed in order to accommodate construction of the new Highway 63 river bridge, associated approach ramps and retaining walls in Red Wing.

The Red Wing underground transmission line project will help to ensure electric reliability for residents and businesses. More information is available at Transmission.xcelenergy.com.
